endorsement of their proposals at

"The point is that we have to deal with parliaments," Mr. Stol-tenberg said. "Central banks and finance ministers cannot take autonomous decisions."

Currency markets swing even more wildly than usual during the summit meeting, first pushing the dollar sharply lower on comments

# Nakasone Is Criticized For His Role at Summit

By William Branigin

TOKYO - The Tokyo economic summit meeting is being viewed by many Japanese as a failure for their country, posing some serious questions for the prestige and polit-ical future of Prime Minister Yasuhiro Nakasone:

Mr. Nakasone is widely believed to nurse hopes for an unprecedented extension in office after his term. expires next fall. But the public perception that he botched the summit meeting could block such

Japanese have tended to judge the summit meeting on one issue: whether it would stop the more than 30-percent appreciation of the yen against the dollar in the past seven months. Japanese industry is more expensive to foreign buyers.

During summit sessions, Mr. Nakasone argued that the yen had risen intolerably high. His guests, who tended to consider the strong yen long overdue, and crucial for correcting international trade imbalances, listened politely and gave

virtually nothing.

The news helped to push up the yen again, reaching a new postwar high, 165.20 to the dollar, on the

last day of the meeting.

Many Japanese do see a positive side to the summit meeting, particularly a commitment for closer cooperation and consultation in poliucs and economy. But the pluses tend to be abstract, while the minuses are more specific, a matter of

. By some accounts, no one could have done much better than Mr. Nakasone.

Bunroku Yoshino, chairman of the Institute for International Economic Studies, a major Japanese think tank said: "People expected that we could stop the appreciation of the yen or at least reverse the trend. That was of course a futile effort from the beginning. But that's what was expected of him."

Opposition parties have issued condemnations of the prime minister's performance. More significantly, some senior figures in the ruling Liberal Democratic Party and leaders of big business have complained over the outcome, an implicit criticism of Mr. Nakasone "I am unsausfied." Takashi Ishi-

Yasuhiro Nakasone

hara, chairman of the Japan Committee for Economic Development. an influential association of business leaders, told a Japanese newspaper. "I wish that they had stressed more effective joint intervention in the currency markets."

Public fears that a strong yen will bring unemployment could help Mr. Nakasone's rivals for the prime ministership. So might resentment over the Tokyo traffic jams caused by summit security measures and seen on television all over Japan.

Now in his fourth year in office, Mr. Nakasone is Japan's most en-during prime minister since Eisaku Sato, who left office in 1972. The summit meeting was particularly important to him because he has claimed a special facility in dealing with foreigners.

He is an unusual leader by Japanese standards. He has considerable charisma, can make jokes in English and is on first-name terms with President Ronald Reagan, in what is known here as "the Ron-Yasu relationship.'

Japanese political commentators say Mr. Nakasone felt his stock would be boosted both by scenes of him chatting amicably with Mr. See NAKASONE, Page 2

Reagan **Praises** Summit Says U.S. Is Free

TOKYO — President Ronald Reagan said Wednesday that allied leaders had agreed to "act togeth-

er" to fight terrorism in a way that

does not preclude such unilateral

military action as the U.S. bombine

But Mr. Reagan also said that the leaders of the seven major in-

dustrial democracies had agreed

that the battle against terrorism "shouldn't be dependent on a sin-

gle nation to try and find an an-

of Libya last month.

To Act Alone On Terrorism By David Hoffman

finance ministers of the seven nations agreed that certain strategies were needed, there were likely to be problems for many of them gaining

[President Reagan said at El-mendorf Air Force Base in Alaska, where he stopped Wednesday en route home from the summit conference, that in Tokyo the United States got "all we sought," particu-larly a tough altied stand against terrorism, United Press Internaional reported.

[Mr. Reagan, his wife, Nancy, and aides made a 58-minute rest stop at the base at Anchorage half-way through their 14-and-a-half bour journey to Washington. The president was scheduled to be back at the White House about 2 P.M. EDT, officials said.]

In his news conference at the conclusion of the summit meeting, Mr. Reagan said the allies were ready to "isolate those states that provide support for terrorism, to solate them and make them pariahs on the world scene and even, if possible, to isolate them from their

own people."

He denied that the U.S. bombing attacks on April 15 were intended to kill the Libyan leader, Colonel Moamer Qadhafi. But, he added, "I don't think any of us would have shed tears if that had happened." Asked about news reports that the United States might be planning another attack against Libya, Mr. Reagan said none was planned

Although last month's strike was criticized at the time by some allies, Mr. Reagan stressed repeatedly had agreed to a "unified front" in

opposing terrorism.
While the United States reserves the right to act unilaterally, Mr. Reagan said, he suggested that the allies would decide jointly on retaliation against terrorists. He said the nations "together will decide upon what is appropriate, depend-ing on the acts, what is the most

effective thing to do." He said that all the "tools and weapons" available for combating terrorism had been discussed, although the other leaders had offered differing views on how far

their countries were willing to go.

He acknowledged that the other leaders had privately discussed

and political ties to Libya. "All of them were talking about their problems, their relationship with Libya, and many of them were making at general to the what they thought they were going to do."
Mr. Reagan said.
He said the statement on terror-

ism issued Monday was a message to nations other than Libya that sponsor terrorist actions. The statement, he said, was "saying to those other countries, We intend this to make them think also and realize that they are covered by this agreement — that they will have to face meters) away, spread to three all of us united if we get evidence points in the complex. "Iraqi planes violate

His comments came at the end of what he described as "this triumph at Tokyo," which he called the See REAGAN, Page 2

also adopted new tactics. Criticism of France for refusing overflight privileges was muted. Talk of more air strikes was discouraged. And, most important, the anti-terrorist steps taken by the Europeans were applauded, rather than being de-rided as too little, too late.

A senior White House official said: "By the time we left for To-kyo, it was evident, despite all the headlines about a split between Europe and the United States, that the Europeans were trying. So we de-cided to let that develop, to let the it as far as we could. To our surit was pretty good, a bit more subtle than we usually are. The Europeans live in a world of subtlety, but we tend not to do that."

Mr. Reagan took the same approach here, discussing an "array" of possible actions rather than identifying one or two specific measures, such as an oil embargo, as the acid test of European good faith in combating terrorism. A State Department official asked a couple of days ago: "What's the point of the president pressing them to do things he knows they don't feel able to, then saying they've failed him?"

Further, when at dinner on Sunday night Mr. Reagan handed his colleagues a paper containing his "thoughts" on terrorism, it was a call to arms rather than an agenda demanding any specific course of action. And it contained this pas-

sage, designed to get them to focus on the big rather than the small

# Senate Rejects U.S. Arms Sale To Saudi Arabia By Wide Margin

By Edward Walsh

WASHINGTON - The Senate has voted 73-22 to reject a proposed \$354-million arms sale to Saudi Arabia.

The vote marked the first time the Senate has explicitly rejected a gin, if sustained, was large enough to override an almost-certain veto missiles elsewhere, costing the U.S. economy jobs and millions of dol-lars and undercutting administraof the resolution by President Ron-

The House was expected to vote on the resolution Wednesday, with opponents of the sale predicting final passage by close to the twothirds majority necessary to over-

ride a veto. Passage of the disapproval resolution by both chambers had been expected, with the crucial battle shead over the attempt to override

the anticipated veto. Opponents of the sale, led by Senator Alan Cranston, a Democrat of California, sought to muster as large a vote as possible Tuesday night to demonstrate their ability to override a veto.

The 73 votes, six more than needed to override a veto, provided a larger margin than expected.

The margin was all the more surprising because Israel and the main pro-Israeli lobbying organization, the American Israel Public Affairs Committee, did not actively oppose

Mr. Cranston said later that opponents of the sale are "very se-cure" in their confidence that they can override a veto. He predicted that few senators would reverse their positions.

The proposed sale involves deliv-ery to Saudi Arabia of Stinger antiaircraft, Sidewinder air-to-air and Harpoon anti-ship missiles. Mr. Reagan submitted the proposed sale to Congress on April 8 and, suff take its natural course and ride it as far as we could. To our su-30 days. Thursday is the deadline

for congressional action.

In the brief debate, opponents denounced Saudi Arabia for undermining the Middle East peace process, supporting the Palestine Liberation Organization and for condemning last month's U.S. air

raid on Libya. "We want to make it clear that it is not in the national-security interests of the United States to sell advanced weapons to nations that

consistently scorn U.S. interests," Mr. Cranston said. Dismissing the administration argument that the Sandis needed

the missiles for protection against Iran, Mr. Cranston noted that the weapons were not due for delivery until at least 1989. He said the United States gained

little from its previous arms shipments to Saudi Arabia, adding, "Now is not the time to sell more weapons to an uncertain friend in the Middle East." Arguing in favor of the sale, the

# UNESCO Dismisses Critic of M'Bow; An American Also Loses His Position

By Judith Miller New York Times Service

PARIS - UNESCO has dismissed a prominent critic of the director-general Amadou Mahtar M'Bow, and has informed its high-est ranking American that he also must leave the organization, UNESCO employees and Western diplomats said Wednesday.

The dismissals of Dragoljub Najman, a former assistant directorgeneral for cooperation for development and for external relations, and Erwin Solomon, an American who was director of the division of socio-economic analysis, surprised and angered several Western members and observers at the United Nations Education, Scientific and Cultural Organization.

Both were tenured employees entitled to priority in reassignment wage a campaign of intimidation and theoretically could not be dismissed. Mr. Solomon's position was abolished

A Western diplomat, who spoke on condition that he not be identified, called Mr. Solomon's dismissal an ominous development for the UN civil service since nationality has not traditionally been grounds for promotion or dismissal. What we're witnessing is the

beginning of the destruction of the corps of independent international civil servants that was established at the end of World War II," the

Alcino Da Costa, a UNESCO spokesman, said that UNESCO did not comment on individual personnel cases as a matter of policy factor in the dismissals.

"Director-General M'Bow has repeatedly stated that the status of employees would not be affected by their nationality or their government's decision with respect to UNESCO," Mr. Da Costa said.

The United States withdrew from UNESCO in 1984 and Britain followed at the end of last year. Both said that the agency had an anti-Western bias and was poorly

Since the withdrawal of the United States, which contributed about one-fourth of UNESCO's sell the planes in 1981. To win nec-essary congressional backing, Mr. Research had to remain that before annual budget, the organization has begun a series of employee "redeployments" that have been forced by the financial crisis. UNESCO officials have been offered incentives to resign so those remaining could be "redeployed" from programs that were being canceled or phased out.

In a speech Wednesday, Mr. M'Bow said that because of the agency's financial conditions, he

had considered the redeployment ysis. A close associate and friend of 558 posts. Of these, at least 19 said that Mr. Solomon was "exofficials would have to be dis-missed, he said, including two of and intended to protest the action. UNESCO's directors, whom he did Mr. Solomon declined to comment not name.

Word of the dismissals spread as Board, its governing conneil, opened a monthlong meeting. Diplomats said that the Soviet Union was expected to propose to the board that nonmembers of UNES-CO should not occupy posts in UNESCO's secretariat, its senior ranking group.

Mr. Najman, a Yugoslav who has been with UNESCO for 30 years, said that he was stunned by his dismissal, which he learned of Wednesday in a letter from the director of personnel. The letter, dated April 30, cited the agency's fi-nancial crisis, he said, and stated that UNESCO had been imable to find a post compatible with his

He said he intended to protest the action to the International Labor Organization.

UNESCO's 49-member Executive Critic of Mr. M'Bow's leadership.

Board, its governing council,

A Western diplomat said that his removal reflected an effort by Mr. M'Bow to lay the groundwork for a third term as director-general of the organization.

Western diplomats sharply disputed UNESCO's contention that nationality was not a factor in dismissals and redeployments. One official cited a UNESCO memorandum dated April 25 stating that citizens of nonmember nations would be given last preference in

A spokesman for the British Embassy said that there had been no indication that British nationals were being dismissed or discriminated against because of Britain's withdrawal from the agency.

A UNESCO spokesman said

that about 50 British and American employees had already been redeployed in other jobs. UNESCO employs about 2,600 people, 2,200 of them in Paris.

# **Shultz Snubs** 2 Leaders of **Opposition** In Korea

SEOUL - Secretary of State George P. Shultz said he would not meet with the two most prominent critics of the South Korean government during a 24-hour visit here that began Wednesday. Mr. Shultz gave a ringing en-dorsement to President Chun Doo

Hwan and criticized "violent confrontations" with the government. Kim Dae Jung, the opposition candidate in the last free election, in 1971, and Kim Young Sam, a leader of the New Korea Democratic Party, were not invited to have breakfast with Mr. Shultz on

"The Kims are not leaders of their party," Mr. Shultz said on the way to Seoul from Tokyo, where he attended the seven-nation summit meeting of industrial democracies. Mr. Shultz said the two had been invited, however, to meet with Gas-ton J. Sigur Jr., assistant U.S. secretary of state for East Asian and Pacific affairs, but had declined. "I have a limited amount of time," Mr. Shultz said, explaining his refusal to meet with the two opposition leaders. He said the purpose of the breakfast was to

meet with government and opposi-tion leaders with "diversity."

Mr. Shultz said other opposition leaders, as well as supporters of President Chun, would meet with him as he tried to solicit a variety of opinions on the political situation in South Korea.

Lee Min Woo, president of the New Korea Democrats, and Kim Dong Yong, the minority floor leader, were among those invited. Mr. Shultz dismissed any suggestion that South Korea, where demonstrations have been held all spring, some of them violent, had political problems similar to those in the Philippines before Ferdinand E. Marcos yielded the presidency in February to Corazon C.

This notion of parallels is one I hope we can get over," Mr. Shultz said. South Korea, he said, has had "breathtaking" economic growth and a "first-class" military organi-

Under Mr. Chun, he said, the country is moving toward a demo-cratic form of government, and the president will step down in 1988 for the election of a successor. "I didn't say the situation is perfect," Mr. Shultz told reporters. "I

said it was moving impressively in the right direction. Mr. Shultz said the violence, which appears aimed at both the government and the opposition, erodes the stability needed for de-

mocracy to flourish. ■ Aquino to Meet Skultz

In Manila, aides to President Aquino indicated that she is opsed any move that would enable Mr. Marcos to leave his Hawaiian exile, and that this is likely to be conveyed to Mr. Shultz when he and Mrs. Aquino meet in Manila

on Friday, The Washington Post reported. Information Minister Teodoro Locsin Jr. reaffirmed after the weekly cabinet meeting that Mrs. Aquino is against the idea of letting Mr. Marcos seek exile elsewhere. Another aide, Fulgencio Fac-

toran, told newsmen that most cabinet ministers also opposed any at-tempt to get Mr. Marcos to a third

## David E. Rosenbaum of The New

York Times reported: The Senate bill follows the thrust of the plan proposed by President Ronald Reagan last spring and the bill approved by the House of Representatives last December.

It faces a difficult fight on the Senate floor, and will not easily be reconciled with the House bill."

The proposal would vastly sim-plify individual tax returns. Most taxpayers would no longer have to keep careful records. The deductions that would be retained are, for the most part, those, such as mortgage interest payments, that are reported to taxpayers at the end of the year.

In addition to mortgage interest the bill would permit deductions for state and local income and property taxes and, for itemizers, charitable contributions.

Deductions would no longer be allowed for Individual Retirement Accounts, although money already in IRAs and subsequent contribu-tions could continue to accrue taxoverwhelming" margin with few free interest and dividends. The deduction for union dues would be repealed, as would the deduction for state and local sales taxes.

The bill would keep many more corporate tax breaks than the bill the House passed, but it would eliminate many more preferences enjoyed by wealthy individuals. Perhaps the most striking fea-tures are those that would subject

all profitable corporations to a 20percent minimum tax and abolish many of the tax shelters used by

An \$11-million wrought-iron security fence has been proposed for the U.S. Capitol.

# Plan to Protect Capitol Splits Congress Proposal for Anti-Terrorism Fence Stirs Deep Emotions

By Steven V. Roberts

every member of Congress agrees that the U.S. Capitol is the preeminent emblem of American democracy. But they are deeply divided over the appropriate way to protect the building and the people who work there in an age of terror-

The Capitol has long been more open and accessible than the other major federal buildings in Wash-ington. About 10 million people visit the building every year, more than half of them schoolchildren.

But the Capitol is a special place to the people who work in it. Often, as they head for home, they can be seen pansing for a momentary glance at the great dome, profiled against the evening sky. It is a sight and a symbol that never grows old

To some, then, new proposals to protect the Capitol from terrorist attacks threaten to besmirch that symbol and tell the world that the United States is not quite as free as

"It is a sad day, a sad situation," said Senator David H. Pryor, Democrat of Arkansas, when we have to think about fencing off the greatest public symbol of democra-cy in the whole world."

The senator was commenting on New York Times Service a new plan, advanced by members WASHINGTON — Just about of the Senate and House leadership, to build a wrought-iron fence surrounding the Capitol grounds at

> Visitors would be screened far from the building by metal detectors at gates in the fence. Under current procedures, metal detectors are within the doors of the Capitol. The new plan would also banish virtually all the 850 cars that park

a cost of about \$11 million.

on the Capitol grounds daily. The parking lots would be turned into andscaped grounds and fountains. "The terrorists have won," Mr. Prvor said. "Not the war, but at least part of the psychological bat-

"The terrorists have not won," setorted Senator Alan Cranston of California, the Democratic assistant minority leader, who helped draft the plan. "But reasonable people take reasonable precau-

The proposed security measures touch a deep chord of emotion in lawmakers, who are trying to strike a balance between the image they want to project and the building

# U.S., Despite Warnings, to Develop New Aircraft

WASHINGTON — A decision by the Pentagon to develop a com-bination helicopter and airplane for the U.S. Marine Corps followed warnings about the project from Pentagon analysts and the House Armed Services Committee.

Critics say the aircraft, called the V-22 Osprey, is entering full-scale development at a time when there

### U.S. Senate Passes **Bill That Relaxes** Gun-Control Law

New York Times Service WASHINGTON -- The Senate has given final passage to a bill that eases several provisions of the U.S. [ederal law on gun control, The bill. which the House approved last month, now goes to President Rea-

gan, who is expected to sign it. Passage came Tuesday on a voice vote. In an unusual procedural move, the Senate at the same time approved a package of amend-ments, introduced as a separate bill, that was designed to meet ob-jections of a coalition of law-enforcement groups that had lobbied strenuously against the main bill. The House is expected to approve

The main bill makes it easier to buy, sell and transport firearms across state lines. It also limits record-keeping requirements by gun dealers and increases the number of people who can legally sell firearms without keeping records. These provisions were sought by the National Rifle Association, which made the bill a top legislative priority and said it spent \$1.6 million lobbying for its approval.

One of the amendments requires gun dealers to keep records of all sales from their personal collec-tions. Another is designed to close what law-enforcement groups had identified as an unintended loophole in the main bill's definition of those who must be licensed to "engage in the business" of dealing in firearms. This amendment makes clear that the definition applies to those who provide firearms at cost, as well as at a profit, to groups or individuals who advocate violence.

# Multiracial Party Wins in Malaysian State

By Michael Richardson

KUALA LUMPUR Malaysia - The ruling multiracial party in the east Malaysian state of Sabah swept aside its mainly Moslem opponents to score a landslide reelection victory in results announced Wednesday.

The victory of the Parti Bersatu Sabah in elections held Monday and Tuesday is expected to end a long period of political turmoil and violence in the state and tension with the national government, according to political analysts.

In several weeks of violence last March, more than 50 bombs were set off, five people were killed and more than 1,500 were arrested for rioting and illegal assembly.

The analysts said the National Front, a coalition whose 11 constituent parties control the govern-ment in Kuala Lumpur and all of Malaysia's 13 states except Sabah,

member after rebuffing it last year.
The party won 34 of the 48 seats in was discriminating against Moslems, but the ruling party vehe-mently denied this and said the people should decide the political future of the state in elections.

Moslems form the largest single ethnic group in Malaysia, which has a population of 15 million. But in Sabah, the country's richest state. Mosiems are outnumbered by predominantly Christian Kadazans and non-Moslem Chinese.

The Kadazans are the largest indigenous group in Sabah, which lies on the northern part of Borneo

Mr. Pairin said his victory proved that the party had substantial support among all religious and racial communities in the state, noting that it had won nine of the 22 predominantly Moslem seats. He said his new cabinet would be made up of five Kadazans, four Moslems and three Chinese.

In another development Dr. Mahathir announced a cabinet reshuffle that analysts said was intended to promote an image of renewed unity and purpose in the National Front at federal level to cope with a serious economic recession in Malaysia.

The reshuffle followed the resignation of Deputy Prime Minister Musa Hitam on March 16. He complained of being excluded from decision-making and being wrongly accused of trying to undermine Dr. Mahathir's position.

The analysts said the cooling of the Sabah issue and the request of the Parti Bersatu Sabah to join the front was one of the factors likely to prompt Dr. Mahathir to call ear-

National elections are expected in July or August, well before the government's term of office expires in April 1987.

small miscellaneous groups.

More than 20,000 cases of AIDS

to screen all blood donations.

plant, rose to 15 milliroentgens per hour, but by Tuesday had dropped Specialists here found it difficult

to believe the radiation level was that low so close to the plant. They noted that on Saturday, Boris N. Yeltsin, a high-ranking Soviet offi-cial, said on West German television that radioactivity at the accident site "has dropped considerably, but is still at 200 roentgens per hour."

On May I the Soviet governmen mounced that radiation levels in Pripyat were down by 33 to 50 percent, without saying how high they had been.

A handbook on radiation by Francis L. Brannigan of the U.S. Department of Energy says that in a population exposed to 500 roentgens within a short time, half would die. The first deaths would occur with exposures of 200 to 250 roentgens, whereas at 25 roentgens there would be no observable effect.

It is suspected by radiation specialists here that before the evacuation, inhabitants of the area inhaled enough radioactive iodine-131 to affect their thyroid

Iodine tends to lodge in the thyroid gland and can cause damage sufficient to produce nodules and possibly cancer many years later. They may also have been exposed to radiation from particles of strontium-89 and -90 and cesium-137.

The strontium emits high-energy beta particles. The cesium radiates gamma rays. Such fallout can enter the body through food, presenting Ratil Prebisch, 83, -Concern had been expressed that a long-term threat to area residents.

■ Worldwide Agency Sought

the nuclear accident at Chernobyl, believe there is an urgent need for an international agency to coordinate health information about radiation levels and to react more rapidly to such a disaster, The Washington Post reported.

No international mechanism was in place to begin immediate collection, dissemination and interpretation of potential health consequences, if any, of the myriad radiation readings gathered by dozens of countries as the radioactive particles spewed from the Soviet plant drifted around the world, of-

ficials said. Instead, since Sweden reported the first increase in radioactivity last week, there has been a piecemeal country-by-country scramble to track down radiation reports and their potential health implications, from short-term consequences for food and water to long-

■ EC Considers Import Ban

term disease rates.

European Community diplomats agreed Wednesday on a plan that would suspend imports of fresh food from seven East European countries until May 31 because of the Chernobyl accident, Renters reported from Brussels.

The plan, which adds Yugoslavia to a list of countries proposed Tuesday by the EC Executive Commission, will be considered by member governments, which are being asked to give approval by Thursday afternoon, diplomats

They said there was a possibility that the plan, which must receive unanimous approval, could be de-feated by Italy, which wanted a

more wide-ranging ban.

The commission had proposed suspending imports of milk products, animals for slaughter, fresh meat and vegetables, and freshwater fish from the Soviet Union, Hungary, Poland, Bulgaria, Romania and Czechoslovakia. Poultry and horses were added to the list

Wednesday. The diplomats agreed that the oan, which probably will come into force on Saturday, should be reviewed on May 20.

# Marseille's **Socialist Mayor Dies** At Age 75

MARSEILLE - Gaston Defferre, 75, the Socialist mayor of Marseille for more than 30 years and a leading figure in postwar French politics, died Wednesday of head injuries suffered in a fall at his

Mr. Defferre, a millionaire, ran twice for the presidency, in 1965 and 1969, in addition to his roles as government minister, parliamentarian and newspaper proprietor. His last government posts were in the 1981 Socialist administration of President François Mitterrand, who awarded him the Interior Min-

In July 1984, Mr. Mitterrand switched him to the planning and regional development portfolio, the first step toward an honorable retirement.

A staunch anti-Communist, Mr. Defferre spent much of his career fighting off challenges to his posi-tion as mayor of Marseille, first from the far left and more recently

from the far right.

He was leader of the Socialist group in the National Assembly from 1967 to 1981. He held on to his post as interior minister through three Mitterrand government reshuffles.

Mr. Defferre was born into a wealthy Protestant family in south-ern France. He studied law and joined the Socialist Party in 1933. He later said Socialism offered him a chance to work in favor of the

underdog.
After the Nazi invasion of France in 1940, he became a member of his party's clandestine executive and made several trips to Britain and Algiers for talks with General Charles de Gaulle.

The resistance network he headed carried out several major operations against Nazi forces and helped Allied airmen shot down over France to escape capture.

Mr. Defferre was first elected mayor of Marseille for a year immediately after the liberation. He struggled to keep the city out of Communist hands when most of southern France was under Com-

munist control. He finally swept out the Communist-led town council in 1953 and had been mayor since then. In the 1950s he was minister for French overseas possessions and minister of the Merchant Marine. In 1951 he became director of the Marseille newspaper Le Provençal, turning it into one of the country's major Socialist press organs.

**Argentine Economist** 

NEW YORK (NYT) - Raúl Health officials in the United Prebisch, 85, the Argentine econo-States and abroad, concerned about the disorganized response to development throughout the development oping world, died April 29 in New York City. In the 1960s, Mr. Prebisch was

probably the Third World's leading economist. Regional accords such as the Central American Common Market reflected his calls for coop-

In 1963 he was appointed secre-tary-general of the United Nations Conference on Trade and Development, a post he held for six years.

Hu to Visit West Germany

BONN --- The secretary-general of the Chinese Communist Party, Hu Yaobang, is to visit West Germany next month at the invitation of Chancellor Helmut Kohl, the government said Wednesday. A statement said Mr. Hu also would meet with opposition politicians during his visit June 12-16.

### Living Abroad

# **Best of Both Worlds:** Bilingual Children and Their Parents' Choices

By Sherry Buchanan International Herald Tribune

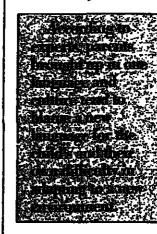

Among other major questions for people living in foreign countries, parents have to decide whether to educate their children as if they were still at home, whether to immerse them in the foreign language and culture or whether to try to get the best of both worlds.

A major objection to total or even partial immersion is no longer valid. Recent academic earch has discredited the long-held assumption, especially among American parents, that learning another language leads to writing, spelling and reading disabilities and possi-

bly psychological traumas.

According to a series of recent studies, children have no trouble picking up another language and, on average, becoming fluent in it after three years. And bilingual children score better than other children on

certain aptitude tests. In "divergent" thinking, for example, the ability to look at a problem from different angles, bilingual children, test 5 percent better. They also test better

on the ability to concept abstractions.

But there are some drawbacks: Children can start talking later than they should, get bad grades because they are reading and writing in their second language when they should be using their native tongue, cannot spell in either language and develop a foreign accent in

their native tongue.

Carolyn Douglas, a family therapist, said, "Bringing up a child in another culture than his or her own has its complica-

at which the child learns to speak, read and write," added Mrs. Douglas, who is the director of Exploring Parenthood Trust, a London-based group that works with expatriate and multicultural families. "In the end it is supposed to all even out, but it has its strains along the way.'

Mrs. Douglas notes that her year-old son was far behind in his ability to read English when he returned to England after two years in France, where he read and wrote in both English and French. Only six weeks after he returned home, his reading age in English jumped by 18 months.

Experts say that any difficulties experienced by the average child are not related to learning or maintaining two languages but to a multitude of other factors, such as new friends, the school environment and parents' anxiety over the new cul-

Hugo Baetens Beardsmore professor of English and bilingualism at Vrije Universiteit Brussel, the Flemish university in Brussels, and author of "Bi lingualism: Basic Principles," said: "There are very few studies that show that children are confused about language. It is the parents who are confused."

According to experts, parents brought up in one language and culture tend to blame a new language for the child's and their own difficulty in adapting to a new environment. They want their children to pick up a second language, but can feel alienated once the child does.

Susan Reimer-Torn, publisher and editor of Kids Extra, a Paris-based quarterly publica-tion, said: "The idea that my first son had to learn French was a nuisance to me. I felt imposed upon by a new culture, and language was an easy thing to take it out on."

But she and her husband, a Frenchman, stuck to what experts call the golden rule: one parent, one language. If one parent tries to speak two lanrages, these experts feel, the child becomes confused. Mrs. Reimer-Torn spoke her native English, her husband his native French. Their son, now 7, became fully bilingual.

Vivian Cruise, a bilingual psychologist who lives in Paris and has two bilingual children, said: "I know of cases where the children really did have problems learning a second lan-guage, but it is more a psychological problem than a language problem. The child doesn't know where it's at if the parents don't know where they're at."

Whatever the school system. it must be supportive and accepting of the bilingual child.
"My daughter's grades are suffering and she cries a lot," said Stephanie Simonard, senior manager at Peat, Marwick,

Mitchell & Co. in Paris. Mrs. Simonard's daughters who are bilingual at age 8 and 10, attend a local French school. They are also enrolled in a part-time course at an international school so they can keep up their knowledge of the American language and culture. As a result they miss a day of

class at the French school. "The teachers at the French school are scheduling tests while she is away and are putcard." Mrs. Simonard com-

International schools attempt to provide the best of both worlds by offering courses in both native and foreign lan-guages, as well as a choice of final degree. Families posted for a couple

of years in a series of countries may prefer during the years they spend abroad to keep their children in schools where their native tongue is spoken.

Marilyn Kotati's busband is with the U.S. State Department, where postings abroad average two to four years.

"We opted for continuity in case we move," she said. "The most important thing, we felt, was to keep our son in an American curriculum to ease the transition back to the United

Her son attends an American school in Neuilly, a Paris suburb, and gets one hour of French a day.

# Ethiopia and Somalia Opening Talks, First Since Ogaden Border War of '77

ADDIS ABABA - Ethiopian and Somalian officials were to meet here Wednesday in their first face-to-face effort to bring an end to the lingering dispute over the Ogaden border region.

Before the talks began, Ethiopia

said it would demand that Somalia recognize existing boundaries as a precondition for lasting peace.
Foreign Minister Goshu Wolde

of Ethiopia said Wednesday that Ethiopia Seeks Extradition "if Somalia recognizes the existing boundaries of Ethiopia and respects its territorial integrity, other differences existing between the two countries are not insurmount-The talks here were arranged by

President Mobammed Siad Barre of Somalia and Lieutenant Colonel Haile Mengistu Mariam of Ethiopia when they met in Djibouti in January, the first meeting between the two nations' leaders in 10 years. in California Ethiopia and Somalia fought a He had gained prominence as ing in Ethiopia.

area after Somalia invaded Ethiopia in 1977. The Somalians were tional aid resources donated to finally driven back by a combined Ethiopian and Cuban force, with both sides suffering heavy losses. Guerrilla warfare has continued sporadically in the area. Somalia has historically laid

claim to the Ogaden, which is inhabited mainly by ethnic Somali nomads. Ethiopia's ruling military council has called for the extradition from

the United States of Dawit Wolde Giorgis, the former head of its Relief and Rehabilitation Commission, whom it accused of embezzling thousands of dollars, Agence France-Presse reported.

Mr. Dawit disappeared in December while on a fund-raising tour of the United States and Westem Europe and is said to be living

fight starvation in Ethiopia. The ruling council accused him Tuesday of having personally em-bezzled \$300,000.

The council said he stole other funds with the help of friends and

Mr. Dawit was said to have drawn the funds from accounts held by his commission at Ethiopia's mission to the United Nations and the Ethiopian Embassy in London, where individual donors were encouraged to deposit contribu-

Before his disappearance, Mr. Dawit was a trusted member of the Central Committee of the Worker's Party of Ethiopia.

His absence delayed aid planning by the many countries and manitarian organizations work-

### SCIENCE

# Super Cells: New Dawn for Solar Energy

By Walter Sullivan New York Times Service
BREAKTHROUGH in the

A design of photovoktaic cells devices that convert sunlight directly to electricity — is reawakening interest in solar energy.

Some of the most promising advances in solar technology have occurred so recently that energy specialists say there has not yet been time to evaluate their long-term re-liability or to develop their full po-· tential. Nevertheless, these specialists say, sunlight is expected to emerge as a significant source of energy in the United States when oil and gas prices inevitably rise

> The most recent development. announced by researchers at Stanford University, is a novel solar cell that has reached 27.5 percent efficiency in converting sunlight to electricity. With modifications, the cell's efficiency is expected to reach 30 percent. Until now, the best silicon-based solar cells were 21 percent efficient

> Other advances have come in designs that use computer-guided sun-tracking mirrors or dishes to cocus sunlight on "power towers" or containers of fiquid or gas, which produce steam that in turn drives engines or turbines.

These advances could also reduce the cost of generating solar energy so much that it would rival conventional fuels by the end of the century, according to an assessment by the Electric Power Research Institute, an organization

One such solar dish design, built by McDonnell Douglas Corp., is being tested at the experimental site of Southern California Edison Co. at Daggett, 70 miles (115 kilometers) northeast of Los Angeles in the Mojave Desert

duce electricity indirectly, through

Its mirrors are assembled to form a dish 36 feet (11 meters) wide that, guided by computers, follows the path of the sun across the sky and focuses sunlight on a tank of hydrogen. As the hydrogen expands it drives a four-piston en-gine, generating 25 kilowatts of electricity, enough to supply the power needs of about 15 houses. A field of 2,000 such dishes would produce 50 megawans, enough to

supply 30,000 homes.

Nearby in Daggett is the 30-megawatt SEGS-2 plant (for Solar Energy Generating System). Built in nine months at a cost of \$95 million, it is described by its designers as the world's largest generating plant powered primarily by sunlight. Its 85,000 mirrors, covering an area of 135 acres, are aligned to form east-west troughs that fo-cus sunlight onto oil-filled tubing. Computers adjust the tilt of the troughs during the day to match the changing elevation of the sim.

As the oil passes through the tubing it is heated to 590 degrees Fahrenheit (310 degrees centi-In addition to this amorphous grade). This heat is transferred to water, producing steam that is then stances are being tested for multi-layered cells, including amorphous superheated to 780 degrees by gas, which in turn drives a turbine gencrator.

SEGS-2 was built by Blount International using technology of Luz International with financing by a number of banks and other private investors. Ownership is shared by a subsidiary of CP Na-

### 2 Woodpeckers, Feared Extinct. Sighted in Cuba

U.S. and Cuban scientists have discovered at least two ivory-billed woodpeckers in a Cuban forest — the first sighting in years of a species many experts had be-lieved extinct. The ivory bill is North America's largest woodpecker.

### IN BRIEF

# Vitamin Megadoses Called Dangerous WASHINGTON (AP) — A panel of scientists and the Food and Drug

Administration have warned of dangers in so-called megadoses of vita-mins and minerals and urged U. S. doctors to record patients' vitamin use and report side effects related to vitamin overdoses.

Saying the scientific community was "concerned with the increasing notion that supplements can be used to prevent serious diseases" such as cancer and osteoporosis, Dr. David Heber, chief of clinical nutrition at the UCLA School of Medicine, said: "Americans should get their nutrients from food instead of pills. Large supplement doses of single nutrients won't prevent disease but instead will upset absorption of other

### Fear Paralysis Blamed in Crib Deaths

OSLO (Reuters) - Sudden infant death syndrome may be triggered by paralysis resembling that of a terrified animal, according to a neurophysiology professor in Stavanger. It may also be linked to parents' cigarette

origy processor in stavanger. It may also be limited to partials digastic smoking and to heavy, tightly wrapped bedclothes, he reported.

Professor Birger Kaada noted in "Sudden Infant Death Syndrome: The Possible Role of the 'Fear Paralysis Reflex,' " that while crib death claimed the lives of 10,000 babies a year in the United States alone, research showed a surprisingly low occurrence in Hong Kong.

### **Drug Linked to Infants' Hemorrhages**

BOSTON (AP) — Heparin, a drug widely used to keep blood from clotting and blocking the tubes that help doctors monitor the vital signs of premature babies, may contribute to dangerous brain hemorrhages, a

study suggests.

The study published in the New England Journal of Medicine found that babies who get heparin were four times as likely as other premarie. infants to suffer germinal matrix-intraventricular hemorrhage. Heparin is given to about three-quarters of premature babies in intensive care in the United States. About half of all newborns under 3.3 pounds (1.5 kilogram) suffer some degree of brain hemorrhaging.

"This study in no way proves that heparin causes this kind of bleeding," said one of the researchers, Dr. Allen A. Mitchell of the Boston University Drug Epidemiology Unit. "It suggests a need for further

### Rubella Vaccine Risk Called Minimal

ATLANTA (AP) - The national Centers for Disease Control, whose munization Practices Advisory Committee recommends that pregnant women not be vaccinated against rubella, now says it has no evidence that the rubella vaccine in use since 1979 causes birth defects similar to those caused by rubella itself.

Rubella, sometimes known as German measles, is mild, but in pregnant women it can lead to congenital rubella syndrome, causing serious birth defects. The recommendation against rubella vaccine for pregnant women still stands, the CDC said, "because of the theoretical, albeit

A CDC study of 153 women susceptible to rubella, who gave birth to live infants after receiving the rubella vaccine during pregnancy, found no birth defects compatible with the syndrome, which can cause blindness, heart defects and mental retardation.

### Sub to Explore Geysers in Atlantic

WASHINGTON (AP) - Hot undersea geysers, once thought to be limited to the Pacific Ocean, are attracting scientists to the Atlantic, where this month and next researchers will dive down more than two miles (three kilometers) in the research submarine Alvin to study vents

"It's not just that these things are spectacular. They concentrate critical mineral deposits on the sea floor, copper, zinc, and possibly silver and gold; as well as having a very important chemical impact on the composition of the oceans," said Dr. Peter Rona, an oceanographer with the U. S. government's National Oceanic and Atmospheric Administra-tion in Miami. The geysers are about 1,800 miles east of Miami, along the Mid-

Atlantic Ridge. Dr. Rona said thousands of shrimp, clams and worms. lived near the vents, eating bacteria that exist on chemicals in the hotwater. The result, he said, is a food chain that exists without light something once thought impossible.

## Soviet Envoy To Paris Gets Moscow Post

By Walter Pincus hington Post Service

WASHINGTON - Yuli M Vorontsov, the Soviet ambassado to Paris, who has been widely rumored to be the leading candidate o become Moscow's next envoy to Washington, will instead return to Moscow to become first deputy foreign minister, Soviet sources said Tuesday.

Mr. Vorontsov served in Washington as the No. 2 man in the Soviet Embassy in the 1970s. In Moscow he will replace another America specialist, Georgi M. Korniyenko.

Mr. Korniyenko will move from the Foreign Ministry to the Communist Party Central Committee, where he will become a deputy to Anatoli F. Dobrynin.

Mr. Dobrynin, the former ambassador in Washington, has been named a Secretary of the Central Committee.

Mr. Korniyenko was one of two senior officials in the Foreign Ministry deeply involved in arms-control negotiations with the United States. The second, Viktor Komplektov, the deputy foreign minister, also has been moved out of this policy area in the ministry and will be given new duties, the sources

# NBC Assailed on Talk With Terror Suspect

By Peter J. Boyer

NEW YORK --- An agreement made by NBC News to keep secret the whereabouts of a terrorist suspect in exchange for an interview, has stirred a debate within the press and government over the propriety of the arrangement. In Tokyo, the head of the U.S.

State Denartment's counterterrorism office, Robert B. Oakley, said Tuesday the deal had made NBC an accomplice to terrorism. On Monday night and again on

Tuesday, NBC broadcast a threeand-a-half-minute interview with Mohammed Abbas. Mr. Abbas is under indictment in the United States on a murder charge in the killing of Leon Klinghoffer, a U.S.

### **Swaziland Chief** To Be Hanged

MBABANE, Swaziland — A tribal chief, Magungwane Shobgwe, was sentenced Wednesday to be hanged for the ritual murder last year of a 10-year-old shepherd boy. He is believed to be the first tribal chief to be sentenced to death since Swaziland gained

independence in 1968. A state prosecutor told the court Tuesday that Mr. Shobgwe and Maniki Dlamini, who also was sentenced to be hanged, had strangled the boy, smashed his head with an axe, dipped the boy's head in blood and thrown the body into a river. The body was found in South Africitizen, during the hijacking of the Italian cruise ship Achille Lauro in In the interview, conducted at an

indisclosed location by a Londonbased correspondent, Henry Champ, Mr. Abbas threatened actions against Americans within U.S. borders and called President Ronald Reagan "enemy No. 1."

Terrorism thrives on this kind of publicity," a State Department spokesman, Charles E. Redman, said Tuesday in Washington. He added that such publicity "encourages the terrorist activities we're all seeking to deter."

But the harsbest criticism against NBC was not over the interview itself, but over the deal for silence that NBC made with Mr. Abbas. Mr. Oakley said in an interview with Cable News Network that when news organizations make

such arrangements, they are saying.

"We've become his accomplices in

AS THE SATIN SHEATH WITH THE FERN

"The news media must be inde-

Lawrence K. Grossman, president, must not be government dent of NBC News, defended the controlled," Mr. Osgood said. "But interview and said he was "dis-mayed" by the State Department's Abbas and his kind call the shots, Timothy J. Russert, a vice president of NBC News, said "every-

body was attempting to get an in-terview with Abbas." Warren Hoge, foreign editor of The New York Times, said The Times had a recent opportunity to publish an interview with Mr. Abbas with similar conditions at-

tached and turned it down. "Our feeling," Mr. Hoge said, "was that this was a man who was being sought for murder and that we simply would not go along with an arrangement whereby we would not disclose where he was if we knew where he was.

"Also," Mr. Hoge said, "the most important news was his whereabouts. Not being able to say where he was was just unaccept-

TRIBUTION TO...

WERCAN HISTORY

# Leading at the Summit

The seven at Tokyo did useful work on the riqué declared that future consultation would orld's system of exchange rates. If they left not be limited to conventional international world's system of exchange rates. If they left the details vague, they were clearer on the crucial element. They declared that they share a responsibility to coordinate their economies. This time Washington seems to mean it. The

days of the hands-off currency float are over. The summit did not try to decide whether the dollar has now fallen too low or the yen has risen too high. That is a large question, and one on which the seven are not prepared to agree. But they have sensibly committed themselves at least to keep talking about the exchange rates and the reasons for their swings.

Why did the dollar rise so high in the early 1980s? Huge U.S. budget deficits were the key to it. They pushed up interest rates, attracting flows of foreign money on a scale that America had never seen before. That happened, by coincidence, at a time when other countries, most notably Japan, were deregulating their financial systems and permitting capital to move abroad more easily. As foreign investors bought dollars, they bid the price up to levels that put unmanageable burdens on many American manufacturers and exporters.

That experience illustrates the truth that exchange rates are not independent of governments' domestic policies. When the rates get out of line, the first place to look for the source of the trouble is at home. The Tokyo commu-

issues but would reach beyond them to consider countries' internal growth, their inflation rates and their budget deficits. Those are subjects that several of these governments, including America's, until recently said were nobody's business but their own.

In the history of the Reagan administration, 1981 to early 1985 will be remembered as the period in which the United States refused to recognize any responsibility for exchange rates, or any international obligations that might conflict with its economic plans. But there was a change at the beginning of 1985. One reason was the appointment of James Baker as secretary of the Treasury. Another was the dollar's exchange rate, by then more than 50 percent higher than four years earlier. Since then the United States has been taking a steadily more active part in managing the world's currency system — very much to the benefit of the United States and all others that depend on world trade for their prosperity. The currency system is not a robot. It has to be managed, and only the United States can provide the necessary leadership. At Tokyo the American resumption of that essential leadership was more explicit and more effective than it had been for many years.

- THE WASHINGTON POST.

### So Much for ANZUS?

If New Zealand outlaws visits by nucleararmed or nuclear-powered ships, there would be three good reasons for dissolving its alliance with the United States. The reasons are Japan, West Germany and Britain, whose leaders face

enormous pressure to ban U.S. nuclear arms.

True, it would be a painful rift. The U.S.

Navy has only a marginal interest in visiting

New Zealand. Its three million people are eager to preserve the 1951 ANZUS treaty with Australia and America. New Zealand is an exemplary democracy whose soldiers served beside Americans in Korea and Vietnam. Its nuclear allergy seems to be bipartisan and owes much to France's nearby nuclear tests.

Still, the campaign against nuclear vessels has been relentlessly pursued by a Labor Party with cousins in other allied nations. Unlike the Australian Labor Party, Prime Minister David Lange has made good on his crowd-pleasing pledge in 1984. Last year he barred a destroyer because the United States refused to break its worldwide policy of not disclosing naval weaponry. He was unmoved by cancellations of joint maneuvers and consultations. In August

deny port to nuclear ships.

Whether that violates the ANZUS pact, which makes no reference to nuclear visits, is a legal question. It plainly breaches established practice. The United States warns that New Zealand would thus exclude itself from AN-ZUS and invite a new American arrangement with Australia alone. Law or no law, the United States will still include New Zealand in its vital defense zones. So will Australia. But New Zealanders are not alone in wanting to nestle under America's nuclear umbrella while in-

dulging an anti-nuclear morality.

The Japanese government has long been under pressure to close its waters to nuclear ships. European peace movements and Socialist parties regularly agitate against deployment of nuclear weapons. If New Zealand secedes from a nuclear alliance without paying even a psychological price, that would only weaken the resistance of other governments. If America's point continues to be made firmly, it may sink in before the unwise August vote.

-THE NEW YORK TIMES.

## Missiles for the Saudis

Money alone cannot buy all the American weapons and good will that Saudi Arabia wants, and the U.S. Congress can usefully repeat that message on occasion. But it serves no U.S. interest to cut off the Saudis altogether. That would only drive them into other markets and break their relations with the U.S. military. Congress is wrong to try to block the

proposed sale of \$354 million worth of arms. The Saudis are slow to express their obvious need for stability in the Middle East and for U.S. backing against radical and fundamentalist forces. Yet, much as Americans would prefer a more demonstrative and more democratic ally, they rely on the kingdom, its oil and its strategic value. The missile sale urged by President Reagan would confirm that reliance.

Israel respects that purpose, at least to the point of not opposing the deal; it sees no unmanageable threat to its security. But majorities in the Senate and the House, holier than Jerusalem, seem ready to vote against the sale, even threatening a two-thirds override of Mr. Reagan's predictable veto.

The arguments have not been edifying on either side. The Saudis are accused of not doing enough to encourage Arabs to make

peace with Israel; of giving financial support to Syria and the Palestine Liberation Organi-zation and of challenging the legality of Amer-ica's attack on Libya. In reply, the Reagan administration greatly exaggerates how much the Saudis accept Israel, the importance of their mediations in Lebanon and the imminence of the threat they face from Iran.

The Saudis need to be taken on their own terms. They never risk gestures toward Israel, or America, that would incite Arab radicals. They do pay protection dues to some radicals. to defend themselves and also other moderate Gulf states. They counteract the influence of Iran and Syria by assisting Iraq and Jordan. They invest their fortunes in the West, notably America. They are not conspicuous allies, but they are friends, and useful ones.

The administration has already scaled down this missile order, which consists mostly of Sidewinder air-to-air missiles and Stinger ground-to-air missiles to improve and replace similar systems. The Saudis have faithfully protected American weapons against unautho rized transfer, a safeguard that is lost if America keeps pushing them to buy elsewhere.

- THE NEW YORK TIMES.

### Other Opinion

### Chernobyl: Really One World The Russians have taken a beating for their

failure to alert other countries to the enormous dangers immediately after the Chemobyl di-Saster. Hard though it may be, let's keep polirics out of it. The Russian media do not prey natural or man-made disasters in the way we do. That may be a cultural difference or a political one or a mixture of the two, but we man be sure that they have learned the particuar lesson that radiation on the Chernobyl

scale is a secret that cannot be hidden. But surely one bright shaft shines through the Chernobyl plumes? Are people not more conscious now than they were 10 days ago of being part of an international community? And if so, does that awareness not have important political implications? Statesmen on both sides have been saying for years that despite political differences we have to inhabit the same planet. It was a notorious theoretical truism. Now it becomes a practical and urgent fact.

- The Guardian (London).

### FROM OUR MAY 8 PAGES, 75 AND 50 YEARS AGO

1911: Motorized Ocean Travel Soon EIERLIN - The first ocean-going motor-ship vill make her maiden voyage from Hamburg To New York toward the end of this year, the lamburg-American Steamship Company said on May 7]. Eight ocean-going ships, equipped with oil motors instead of steam boilers, are eing constructed in Germany, and they are xpected to inaugurate a new era of sea travel. he ships will be devoid of funnels, so that reir appearance will add a new feature to the paritime highways of the world. Two of the ips are being built for the Hamburg-Ameriin Company and will be employed for transtlantic cargo carrying. The advantages of the ew ships are the economy of the space now s evoted to boilers and coal bunkers, the reducon of expenditure on fuel and the diminution the number of engine-room hands.

1936: Philippines Said to Need Help BERLIN — "The independence law of the Philippine Islands has turned out to contain definite defects which, if unchanged, will in a few years affect the islands economically to such an extent as to threaten the solvency and stability of the Philippine government," according to K.B. Day, an executive of the Philippines Refining Corporation, who stopped here recently. "The Filipinos are pinning great hopes on the results of the economic conference to be held with the United States either this year or next. The new Commonwealth is now well under way and business is normal. Manuel Quezon, the first Filipino President, has taken hold of the complicated problem of transition in a forceful manner and is making a real effort to give an administration satisfac-

tory to all sections of the community."

# Where Is the Selfless Public Service of Yesteryear?

W ASHINGTON — A reporter once asked General George C. Marshall to name the indispensable qualities of a public servant. He replied: "Courage. Wisdom. Tolerance. An understanding of the democratic procedures."

The remark was in character for that austere

public servant. One of his old army colleagues, Lieutenant General Marshall Carter, recalled in 1980 that he had never once heard General Marshall ask in regard to an official decision, "What's in it for me? How am I going to look?"

General Marshall would have trouble recogrizing Washington today. There are still a few relics of his era around town: Paul Nitze at the State Department and a handful of lawyers, generals and ex-officials. But the capital today is a far different place than in the 1940s, with a different cast of characters and a different set of values. The patrician liberalism of General Marshall's day is long gone, replaced by a populist conservatism that is at once more democratic

and more enthralled by money and power.

The public service ethic that General Marshall embodied is vanishing. This decline is highlighted by some of the extreme cases of the 1980s. But the changes are deeper than a simple list of scandals and indiscretions, which could be compiled for the Truman administration as for the Reaganites. What has happened seems almost a change in culture, a change in the notion of what constitutes acceptable behavior. This change is illustrated as much by David

Stockman, who was one of the Reagan administration's more capable officials, as by Mike Deaver. Both rushed with shameless haste to profit from their public service. Mr. Stockman,

By David Ignatius

with his multimillion-dollar book and banking ventures, seems the most likely to cash in.

General Marshall's generation regarded government service as a virtuous endeavor, worth the personal and financial sacrifices. These Esshment civil servants could afford to make the gesture, of course, since so many of them were already rich. There was something European about this class of patrician civil servants and their noblesse oblige ethic. That may be why the

rest of the country grew to resent them.

In today's Washington, in contrast, government service is instrumental — a way to make contacts, build a reputation, make a reasonable salary — rather than an end in itself. The prevail-ing ideology these days is that virtuous and rewarding work takes place in the marketplace, in the "private sector." Public life is regarded as a regrettable intrusion into this private sphere, and the institutions of government are seen as a necessary evil rather than as a way to do good.

The decline of public service has coincided with other dramatic changes. It is hard to know what has caused what, but these changes are part of the story of how George Marshall's Washington became the city of Stockman and Deaver. Here is a sampling of statistical and anecdotal evidence about the great transformation:

 Rising salaries. The decline of the public service ethic has been accompanied by significant increases in pay. A cabinet officer last year made \$86,200 — not a fortune, but not a hardship wage, either. The big change in pay scales

for senior officials, interestingly enough, came in for senior officials, interestingly enough, came in the late 1960s — at about the same time that the Establishment began to crumble because of Vietnam. The salary of a cabinet officer in 1964 was \$25,000, only \$2,500 more than what he would have earned in 1949. Pay increased slightly in 1964, to \$35,000 a year, but the big jump did not come until 1969, when pay rose to \$60,000.

• Growing affluence. Once upon a time, Washington really was the sleepy little town on the **Promoting**

ington really was the sleepy little town on the Potomac that old-timers remember. No more. According to the April issue of Washingtonian magazine, the D.C. area is now the richest and

best-educated metropolitan area in America. The lobbying boom. The number of political action committees increased more than sixfold in a decade, from 608 in 1974 to 3,992 last year. The increase in PAC contributions to House and Senate races was even greater, jumping from \$12.5 million in 1974 to \$105.3 million in 1984. With the flood of PAC money have come more lawyers and lobbyists. The number of registered lobbyists has more than doubled since 1976.

 The dearth of resignations. It used to be typical for officials who disagreed with policy, or who felt that their useful service had come to an end, to do the proper thing and resign. Paul Nitze decided to resign as SALT negotiator in 1974 because he felt the Nixon administration was too preoccupied with Watergate to do any serious bargaining. Contrast that with the approach of Mr. Stockman, who remained in the Reagan administration for more than four years after he concluded that its fiscal policies would have disastrons effects on the economy.

The Washington Post

# The Coming Recession in Mexico Means Trouble

SAN DIEGO — Mexico is heading for a severe recession this year, and the aftershocks will roll northward, causing problems for the United States that will have nothing to do with Russia. Cuba or Nicaragua.

This crisis for Mexico will be worse than the downturns of 1977 and 1983. Quite possibly it will be the worst nce the early 1930s.

The oil price collapse has been so sudden and so extreme that projections cannot keep up with events. No sooner did the Mexican government rework its short-term forecasts, dropping the anticipated market price for crude exports from \$24 a barrel to \$18, than the price fell to \$12.

Until very recently, many Mexican policy-makers seem to have assumed that after a brief sinking spell, OPEC (or someone) would restore a semblance of order to the oil market; by next winter the glut would disappear and prices would rise. Only now are people beginning to realize that the current weak energy prices could well last to the end of the decade.

This is also a wrenching prospect for Texas, Alaska, Scotland, Ecuador. Venezuela and all the other oil producers who thought their pipenes would always pour forth riches. But the implications for the Mexican economy are particularly severe.

Mexico was already exceptionally vulnerable before this latest blow because oil revenues were so central to its development strategy and even to its political stability.

The Mexican economy has been stagnant for five years. There has been little investment - too little to create productive employment for the increasing number of young peo-ple who leave school and add 3 percent to the labor force each year. Meanwhile, inflation has ranged between 60 and 80 percent a year.

Economic managers trying to service and roll over Mexico's \$100-billion foreign debt have almost no room for maneuver on other fronts. So the last thing they needed was last September's devastating earthquake, which killed tens of thousands in Mexico City (many more than offi-cials admitted) and left hundreds of thousands with makeshift homes and schools. The government outlined its reconstruction plan last December. Exceptional sacrifices would have to be made in the 1986 budget, it said. The trouble was, that budget as-

sumed an oil price of \$24 a barrel. It also assumed that Petróleos Mexicanos, the state-owned oil monopoly, would contribute no less than 45 percent of total budget revenues and that oil would bring about twothirds of Mexico's export revenues. As of now it seems unlikely that Pemex can provide more than 25 percent of government revenues for the foreseeable future. Instead of earning a projected \$14 billion from crude exports, Mexico will be lucky to clear \$7 billion, and \$5 billion may be a

more realistic forecast. Falling interest rates help a bit, but they only partly offset the staggering loss in oil income. Inevitably the gov-ernment will have to cut spending even more drastically than it already has. In the private sector, "export or By Laurence Whitehead

die" will be more than just a slogan. Unlike most other Third World oil exporters, Mexico has a large and relatively sophisticated industrial base. In the long term, exports of manufactured goods could replace oil exports. But the qualification "long term" is critical. Mexican industry is not now geared to mount a great export drive. It mostly supplies a sheltered home market. Ahead lie sudden and disruptive shocks as the government slashes subsidies, domestic demand contracts and sources of credit disappear. Labor unrest and social stress will also take their toll

as the crisis worsens. President Miguel de la Madrid has evidently discovered that Mexico can get outside help only on highly condi-tional terms and on a relatively small scale. As a result, nearly all the effects

and hopes for development will fade. Unlike the recessions of 1977 and 1983, the slump of 1986 may not lead

to a cyclical upturn after a year or so. If oil's price weakness persists, the downturn will prove not only exceptionally steep but also long-lasting.
This bleak prospect is especially likely if foreign creditors succeed as now seems probable - in obliging Mexico to continue giving high prior-ity to servicing its external debt, and if the shift to export manufacturing is

of the "reverse oil shock" will have to

be absorbed internally - through

reduced consumption, reduced in-

To put it bluntly, more Mexicans

will go hungry, more will emigrate

vestment, reduced employment.

as slow and painful as expected.

For the United States, a severe recession in Mexico means trouble.

Exports to Mexico will drop. Tensions south of the border will rise, and so will border pressures. The Mexican government is not likely to collapse under the strain - not yet, anyway. But its behavior may well become more erratic and alarming.

This will not be the work of Communist agents. It will be largely the product of market forces, abetted by nternal incompetence and corrup tion. It will also be the work of dogmatists, mostly in the United States, resolved - sometimes self-servingly - to "set the markets free."

The writer, a fellow of Nuffield College at Oxford University, is co-author of a forthcoming book on Latin America's debt crisis. He is on leave as acting program director at the Center for U.S.-Mexican Studies at the University of California, San Diego. He contributed this to the South-North News Service.

# The Summit Neglected the Third World

T OKYO — Despite the hopeful words of the economic summit communiqué, the leaders took no new or significant action to deal with the critical Third World debt problem, beyond a routine endorsement of the now-famous "Baker initiative" announced last October.

Before the summit, President Julio Maria Sanguinetti of Urugnay wrote the host, Prime Minister Yasuhiro Nakasone, on behalf of the Cartage-na group of debtor nations. He called the plan of U.S. Treasury Secretary James Baker "insufficient," and appealed in vain for lower interest rat Given the history of economic

summitry, it is not surprising that the tough problems get swent under the rng. And the Tokyo summit was overwhelmed by the Soviet nuclear explosion and the terrorism issue. Whatever the limits of summitry, the debt problem is real. As Senator

Bill Bradley, a New Jersey Democrat, has observed, the Baker debt initiative was a significant step because it recognized that Washington's approach to the problem, stressing austerity rather than economic growth, had "reached a dead end." But the Baker plan is too narrow in scope and too demanding on the 15

debtor nations involved: It insists that they make drastic changes in their economies so as to become more "market-oriented" and "growth-oriented." If that "privatization" test is met, Mr. Baker proposed an injection of almost \$10 billion a year in new capital in the 15 nations, over and above what had been planned for the next three years, from commercial banks and international organizations such as the World Bank

The critical problem that the Baker plan fails to address is that the developing countries have had to become large net exporters of capital. The Third World needs relief from this burden. A study by the Aspen Institute says: "If they are to have any hope of growing, and if we are to have any hope of being repaid over anything beyond the very short term, the existing, devastating flight of capital

By Hobart Rowen

net flow of capital must be reversed." Since the debt crisis broke onto the orld's consciousness in 1982 when Mexico could not pay interest on its then \$90-billion debt, these payments have been "rescheduled," that is, added to the total debt owed. In banker Felix Rohatyn's apt phrase. This device is a bridge to nowhere." Despite great effort to boost exports and reduce imports, the total debt has continued to expand. If relief is provided by cutting in-

terest rates and stretching out the terms, many American banks will have to adjust their books to reality and accept damaging losses.

Mr. Rohatyn and Mr. Bradley approach the problem somewhat differently, but both call for dramatic

es in the Baker plan. Mr. Robatyn wants to cut current interest rates to Latin American countries by 4 percentage points, saving them about \$15 billion annually That would cut the profits of Ameri-

can banks, be figures, by \$4.5 billion. He suggests a guarantee of the banks' loans by the United States or the World Bank. In effect, "the banks would exchange current profits for long-term financial security." And to add new capital, he would put the bite on Japan — which is running huge trade surpluses - for \$100 billion over five years, funneled through the World Bank and the Inter-American Development Bank.

Thus, together with \$75 billion in interest rate relief, Mr. Robatyn is talking of the injection of an aid package of \$175 billion of new capital - \$35 billion annually, against Mr. Baker's \$10 billion.

Mr. Bradley emphasizes relief from the existing debt, more than new loans, for countries that initiate their own programs to "rekindle growth" and nurture democratic institutions." A critical test would be the ability of the Third World nations to stop the out of their countries to safer havens.

If the citizens of the developing nations plainly believe their own countries are a bad risk, why should foreigners continue to pump new money in? Mr. Bradley is convinced that his plan would encourage real economic reform from within the affected countries, because it would not be dictated from the outside. If the Baker initiative has stalled, that can be attributed to the political inability of most debtor nations to admit that they are knuckling under to Uncle Sam and the big bankers.

To heads of state and industrial nations' finance ministers, ideas like Mr. Rohatyn's and Mr. Bradley's ap-pear to be off the wall. But, as Mr. Rohatyn says, the banks are already prisoners of their big borrowers. Peru and Nigeria have taken the situation in their own hands and placed a

'cap" on their interest payments.

Mexico, a U.S. neighbor and partner, is a special case. A collapse there could have untold consequences. The Washington Post.

### LETTER TO THE EDITOR

What UNRWA Does

A letter in your May 2 issue raises a number of points about the United Nations Relief and Works Agency, which need clarification.

UNRWA was established by the General Assembly in 1949 to help Palestine refugees. Its mandate has been regularly and unanimously renewed. The agency has always relied on voluntary contributions to fund its programs, and over the years education has become its priority.

UNRWA has a large staff, but with a student enrolment of 350,000 in 637 primary and junior secondary schools and 5,000 in eight training centers a large teaching staff is necessary. Despite having 10,100 teachers, the pupil-teacher ratio in many schools is as high as 50 to i. Any

been directly related to a growing student population, although this year no new teachers were hired because of financial constraints.

 $|t_L|$ 

UNRWA also provides a preventive beaith care program and a small welfare program for the poorest refu-gees. And in the past 10 years it has regularly provided emergency relief for thousands of refugees in Lebanon. Despite the continuing turbu-lence of the Middle East and constant outbursts of violence in Lebanon, UNRWA continues to run

its schools and clinics. Since June 1982, 22 UNRWA employees have been killed in Lebanon while providing UNRWA services to -Palestine refugees living there.

# Canada: Oil Fall **Troubles** The West

TORONTO - The considerable momentum in Canada toward a more open, more business-oriented limate under Prime Minister Brian Mulroney was seriously interrupted, but not derailed, by the collapse of oil prices. That collapse, however, has created serious problems for much of Western Canada, especialthe Edmonton and Calgary real

Neil Young, executive vice president of the Campeau Corp., a major commercial developer based in Toronto, observed that, with sub-stantial overbuilding in recent years, "Calgary is bad, but Edmonton is worse, with net effective rents of two or three dollars a square foot

Mr. Young noted that "in spite of everything, there was actually some talk of new building construction in Calgary" for one major tenant. He predicted that the 1988 Winter Olympics in Calgary would most likely "not have a major impact."

Indeed, Isadore Sharpe, the chairman of the Four Seasons hotel chain, also based in Toronto, noted that "Alberta is a disaster" because of its heavy dependence on the oil

Farther west, however, Mr. Sharpe added, Vancouver's Expo 86, a spectacular though modest world's fair, has been a great success. Nevertheless, many experts have observed that Vancouver's market is soft, with little relief in sight because of the continuing de-pression in the metals and lumber

Ottawa, according to Mr. Young, is a soft real estate market, but some new construction, especially retail, is moving ahead in Montreal, which is rebounding a bit from the bad times of the separatist campaign years, during which there was an exodus of financial activity to Toronto, which continues to boom.

almost doubled in the last few years to around 10 percent, Toronto remains one of the strongest real estate markets in North America. Long a mecca for urban planners system, lively nightlife, robust residential architecture and strong sense of community, Toronto, nevertheless, is at a major crossroads ir its history.

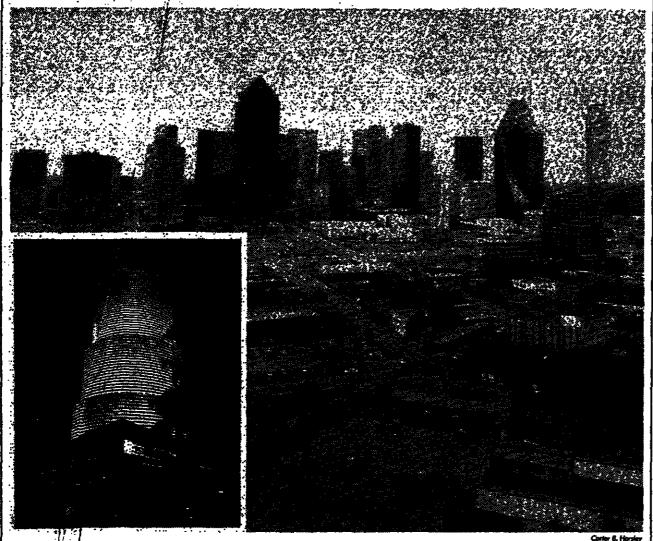

In recent months, it has aproved several developments th will reshape its downtown corelt recently signed a fixed-price en-tract to build a large domed stdium on part of the railroad urds that separate the financial dirict from the waterfront.

In a senarate action, it alo rezoned 200 acres (80.5 hectass) of the yards to permit a maxisum of 12 million square feet (1.1 million square meters) of commercil space and 4 million square feet a housing from a previous mamum of just 6 million square fee of commercial space.

At the same time, pronto is awaiting federal approve of a plan to develop more than 1.5 million square feet of space o a site near the new convention enter in the same vicinity to proade facilities for the Canadian troadcasting Corporation. And oranother adjacent block, approvalias been given for about another 3million square feet of office and buel space on a site owned by Marthon Realty, a subsidiary of the (anadian Pacific railroad.

This total of nore than 13 million square feet rpresents a significant expansion f the area's commercial space but Mayor Art Eggleton does ot foresee the new "heartland" distroying the city's widely acclaimed livability and civility. According to David Thom-son of OxfordDevelopment Company, there se about 22 million square feet is downtown Toronto

Central Dalas: The LTV tower, right, with pyramidal roof, was designed by Skidmore, Owings & Merrill and L M. Pei. But oprbuilding, the banking and oil crises have slowed down the Texas scene (Page 8). Inset, Centrust tower in Miami by I.M. Pei is nearing completion (Page 9).

# Design: Post-Modernism and Beyond

NEW YRK — The quality of architec-tural design for major commercial, retail, public and residential projects in North America as remarkably high in the last year or so for the first time in years.

The were, of course, a number of disappoint ents from some prominent firms, demostrating that there may be a limit as to hownany superb designs can be reasonably exected to be produced simultaneously by thesame firm.

kidmore, Owings & Merrill and L M. Pei. nide significant re-entries into design leaderwith such buildings as the LTV and exas Commerce towers in Dallas for the ormer and the Centrust Tower in Miami and the new Convention Center in New York for

Meanwhile, John Burgee with Philip Johnson and Kohn Pedersen Fox, two of the three "hottest" firms of the last few years, continued to produce interesting, though occasionally uneven, work.

The third firm, that of Helmut Jahn, became more controversial, using rather faded,

bland colors that greatly diminished the energy and originality of its State of Illinois Center in Chicago. It also displayed a great disregard for context in major towers for Bruce Eichner and George Klein in Manhattan.

Nevertheless, the design for Donald Trump for the railroad yards on the Upper West Side of Manhattan and for Olympia & York's submission for the South Ferry project, also in Manhattan, showed that Mr. Jahn is a master form-giver. The former included two sets of three related but different tall towers on either side of a proposed 150story tower that would be the world's talles building. The latter appeared to create a glass case the shape of the Eiffel Tower.

Meanwhile, Michael Graves, the country's most controversial architect and post-modern designer, was asked to redesign his plan for the expansion of the Whitney Museum of Art in Manhattan following strong public opposition to his proposal to tuck Marcel Breuer's Whitney Museum building under a pile of assorted stylized building blocks. Mr. Graves's new design is expected to be essen-

At 383 Madison Avenue in Manhat-

tan, an office tower by Kohn Peder-

sen Fox for the First Boston Corpo-

ration is still in the planning stages. Left, the skycraper; above, detail of

one of the four facades at the top.

tially the lower half of his earlier design. Meanwhile, he has designed a very impres sive, non-post-modern tower for Sotheby's the auction house, that would be built over its existing warehouse-like property on York Avenue in Manhattan. Unlike his rather ungainly Humana Tower in Louisville, Kentricky, the Sotheby's tower promises to be highly articulate and original in its facade, balcony and cornice treatments.

With a few exceptions, post-modernism, at least in its most decorative flamboyance, seems to be fading from the forefront of contemporary architecture, although it ha become de rigueur in interiors.

At the same time, a sense of gaiety, if not humor, has become widely accepted in such new, popular "festival" places as the Horton Plaza mall in San Diego, designed by Jon Jerde for Ernest Hahn, and the redevelopment of the train station in St. Louis by the Rouse Company and Benjamin Thompson. The two best new post-modern projects are

able to humorously play variations on the box-in-a-box-in-a-box theme. One is Hardy Holtzman Pfeiffer's plan for replicating in decreasing order the ornate facade of the former Willard Hotel in an expansion and rehabilitation project in Washington. The other is John Burgee with Philip John-

son's Crescent office, hotel and retail complex near the downtown center in Dallas. The huge, opulent project is rather like a cream puff with wisps of ornate cast-iron filigree seeming to wrap all its diverse elements rath-

er neatly together. The office portion is divided into three sections that are angled in an arc by concave cast-iron screens in front of large plate-glass windows. The arc faces away from downtown and embraces a smaller arc-shape building which is the hotel. On the other side of this is a wedge-shaped retail section with sunker circular cast-iron railings and levels.

Despite its large size, there is almost a dollhouse charm to the project whose château size treats the surrounding low-rise buildings as if they were fallen statuary in a neglected

John Burgee with Philip Johnson also were the architects for another French-inspired project, a grey-stone, medium-sized office building for Gerald D. Hines Interests on Montgomery Street in San Francisco, directly across from the monumental Bank of Ameri ca tower. A well-intentioned, sedate and slight building, it, nevertheless, has what most post-modern buildings do not, prominent sculpture, in this case a series of multistory white shapes standing with classical flair in front of a dark glass version of a slanting mansard-type roof. Almost 30 stories away from the street, the statues are clearly not highly detailed and suggest the vast potential of modern-day whimsical abstract gargoyles, caryatids and the like. In Washington, Arthur Cotton Moore has

# **Development Business** Turns 'Lean and Mean' In a Changing Market

By Carter B. Horsley

NEW YORK — The office-building boom of the 1980s has created a new America that is increasingly decentralized, suburban and vacant despite the continued emergence of glamorous and festive

Fueled more by the availability of aggressive financing than by demand for space, the overbuilding has continued longer than most real estate cycles and a substantial shakeout is expected by many leading developers, brokers, consultants and lenders. They have begun to align themselves in the last year or so with a variety of long-term "hitters" with deep finan-

Declining interest rates, however, together with renewed foreign investment, mounting concerns about international terrorism and the aura of prosperity of the Reagan era have somewhat buttressed the present structure of the development business. However, if the new corporate image is healthy, it is also lean and mean rather than slack and expansive.

Even if a bust is averted, the real estate markets are not likely to revert to the frenzy of recent years. Cushman & Wakefield Inc., a leading national real estate organization based in New York, recently predicted that office starts will be 20 percent to 25 percent lower in 1986 than 1985 and noted that with lower effective rental rates and higher vacancies, building values are expected to appreciate more slowly in the

It also observed that some bargain hunting by investors is likely because prices for many properties may fall below their replacement costs.

Leasing activity is likely to be considerable as many

tenants take advantage of their bargaining position in the office glut by upgrading to newer quarters at little increase in cost, renewing at decreases and obtaining

equity positions in some properties.

David S. Weinberg of the Cadillac Fairview Corp., a major development concern in both the United States and Canada, recently said in an interview that he did not foresee a resurgence of new construction until the

The problem varies greatly from one market to another. New York and Washington are very strong markets. Boston and Philadelphia are undergoing renaissances, as are some smaller cities like St. Louis and Charlotte, North Carolina. On the other hand, the collapse in oil prices has severely hit such energy-dependent centers as Houston, New Orleans and

Mack Pogue, the chairman of the Lincoln Property Co., which is based in Dallas and is one of the nation's largest and most active developers, estimated that Houston may take seven to 10 years to absorb its surplus space, whereas Boston, San Francisco and

Chicago might take only two years.

Mr. Pogue also noted that the trend of municipalities to impose growth controls was not unwelcome, citing San Francisco's adoption of a downtown plan last year that puts an annual limitation on the amount of new construction.

Anti-growth legislation is proliferating from the Carolinas to California. Boston, for example, is discussing a plan to "link" commercial construction to nousing programs and, while such proposals make the development process more difficult, they are beginning to be welcomed by many developers, who would rather deal with specific laws than with the uncertainty of using political clout.

For awhile, office space per worker increased steadily, but the great explosion of such space to meet the transformation of the U.S. urban economy from manufacturing to services may well be slowing

Iohn L. Dowling, executive vice president of Cushman & Wakefield, noted in a recent speech that "it would be unreasonably optimistic to expect that the unprecedented growth in office employment, which occurred in the 1970s, can continue through the

Furthermore, he said, "the reconstruction of the American economy with leveraged buyouts, mergers and acquisitions is shrinking the size of corporate staffs." Mr. Dowling predicted that absorption will decline from close to 200 million square feet (18.6 million square meters) last year to less than 150 million square feet annually for the rest of the decade, with vacancy rates increasing to more than 20 percent over the next year or so, resulting in a three- or four-

year supply of space. year supply of space.

Most markets are now two-tiered, according to M.

Leanne Lachman, president of the Real Estate Research Corp. in Chicago, with existing and tenanted properties remaining attractive while "new developments competing for tenants are less appearing in the short run unless they can be acquired at substantial

According to The Office Network's most recent review of selected markets, the amount of available space, including space under construction, rose to 356.2 million square feet at the end of 1985 from 318 million square feet the previous year. The current figure "is almost five times the absorption of 1985, an indication of a continuing market softness."

Office vacancy rates have shot up about 500 percent in the last five years on a national basis to around 17 percent. Suburbs, however, are several points higher. One recent study estimated that, when current construction is completed, more than 57 percent of the nation's total office market will be outside downtown areas, as compared to about 48 percent in 1981 and 25

percent in 1970. Mr. Dowling said that "suburban and secondary markets will continue to be the recipients of a proportionately larger share of office construction activity

Indeed, only a few cities, such as Chicago, Philadelhia, New Orleans and New York, have larger central business districts than suburban space. Cities such as Los Angeles, Dallas, Washington, Houston, Miami, Cleveland, San Diego, Baltimore, Fort Worth, Texas, Hartford, Connecticut, and Tampa, Florida, have a third or less of their metropolitan region's market in their downtowns.

Circle at the Hudson River promises to be the architect's Miss Lachman observed that sprawling Los Angeles, with its "comprehensive nodes," appears to be the prototype of much new growth. "Downtowns are not dead, nor dying," she said, "but most new employment is going to the suburbs. Five years ago, downtowns captured 50 percent and now it's 35 to 40 percent and downtowns will continue to lose share."

The Hvatt Hotels Corp. recently announced a major expansion program that calls for at least 40 mediumsized hotels geared to the business traveler to be built by the end of 1990 to meet the "rapid rise of deluxe suburban office parks" and "urban villages springing up around major metropolitan areas."

At the top of the market, the Four Seasons hotel chain has launched an expansion program that in-cludes two new mixed-use spa and hotel facilities in the Las Colinas suburban complex near Dallas and a major new hotel in Newport Beach, California. The

group is also beginning to consider resorts.

Some developers, such as the Continental Development Group Inc., in New York, are now focusing on expanding the concept of high technology offices and research-park developments in joint ventures with

George Sternlieb of the Center for Urban Policy Research at Rutgers University said that "last year, roughly two-thirds of total office space was built outside the central city.

He added, "Despite the thin veneer of Manhattan and other world cities, the real center of the pork chop - the jobs and the resident incomes - is outside the circumferential belts, 30 or 40 miles" outside of cen-

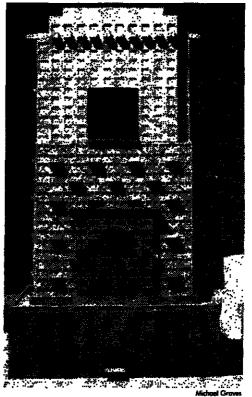

tral business districts.

Mr. Sternlieb noted that recently, "some of the smart money has been pulling out" of real estate

Demand has been quite strong generally, but not enough to offset the tremendous amount of money chasing and creating new construction deals.

Mr. Pogue and many other experts noted that the nation's savings and loan industry "seemed to make several mistakes in their lending programs as to developers and location." He said the "large development companies that had been through overbu before knew what not to do and did not forget," (Continued on Next Page)

Michael Graves's design for a mixeduse tower for Sotheby's in Manhattan.

## **New Housing Starts** Are Expected to Set **Record for Decade**

NEW YORK - The turmoil of the commercial sector is not matched in residential real estate.

The National Association of Realtors reported last month that with long-term mortgage interest rates expected to drop to less than 9 percent by the end of the year, existing home sales and housing starts totals for the year were expected to be the highest of the

It predicted a 2-percent increase for 1987 in existing single-family home sales to 3.6 million, while housing starts were expected to total 1.9 million this year, a rise of more than 11 percent from last year and the highest

Strong demand for housing will cause prices to accelerate. The realtors association said the median existing single-family home price is likely to rise about 5 percent to \$78,900 this year, while the median new-home price is expected to increase 7.5 percent to

The market for condominiums was "the hottest in history in the Northeast," according to a U.S. Housing Markets report published last month by the Lomas & (Continued on Next Page)

### **How Cities Score** On 'Momentum Index'

NEW YORK — Landauer Associates, a real estate consulting firm based in New York, recently created a "momentum index" as a composite indicator to relate growth projections for office employment to the pace of office inventory additions.
The index is plotted on a ratio scale centered on

100, which corresponds to the median demandsupply relationship for large U.S. cities. Metropolitan areas indexed below 100 are considered subject to further weakness before a market correction occurs. The index placed Washington at 100. Dallas had the least favorable index at 42, followed by Orlando, Florida, 44; Oklahoma City, 60; Seattle, 60; Boston and New Orleans, 71; Nashville, 73; Houston and Phoenix, 76; Tampa, Florida, 80, and

On the other end of the index's spectrum, Chicago had the most favorable "momentum" with a rating of 278, followed by Philadelphia, 244; New York; 184; Kansas City, 162; Charlotte, North Carolina, 149; St. Louis, 144; Minneapolis, 140; Los Angeles, 129; Miami and Cincinnati, 122; San Francisco, 118, and Denver, 102.

## Office Market Booms in New York, Outer Boroughs Nine blocks north on Eighth Avenue, Moshe Safdie has

NEW 'ORK — In most years, the defeat of a major end, it is being led by the Metropolitan Tower on West 57th project life Westway, the proposal to rebuild Manhattan's Street, the Equitable Center on Seventh Avenue at 54th highway along the Hudson River and create new land for Street, both nearing completion, and the redevelopment of parks and housing and give access for the first time in decades to the city's prime waterfront, would be sufficient cause fo pessimism about a city's samity, or future.

So strong, however, is the New York City office market that the death of Westway last year was scarcely protested. This was partly because so many new projects were being initiated or completed that even sophisticated planners had trouble keeping track of them.

In Manhattan, new construction and rehabilitation projects jostled with large, new and expensive bistros and boutiques in virtually every neighborhood south of 96th Street, where three large high-rise projects are nearing completion on the East Side.

New construction in the city's outer boroughs has suddenly become a reality, a response not only to the saturation and high costs of Manhattan but also to the growing threat of major development of the New Jersey Hudson River front-

age with its incomparable views of the city. Because the east midtown area has few developable sites left, the west midtown area is rapidly developing at the north that is now going into construction.

Street, the Equitable Center on Seventh Avenue at 54th come up with a prismatic, twin-towered design for Mortimer Street, both nearing completion, and the redevelopment of Zuckerman's redevelopment of the Coliseum side at Columthe former Madison Square Garden site on Eighth Avenue at bus Circle. 50th Street, the Coliseum at Columbus Circle, and the of the railroad yards farther west and north from Columbus railroad yards farther north along the Hudson River.

The Equitable Life Insurance Company's decision to vacate its tower on the Avenue of the Americas and redevel-op a new one on the remainder of the block extending to towers, including one in the middle that would be the world's Seventh Avenue has resulted in a lobby promenade a block tallest building. long, largely due to the installation of two large galleries for

(Continued From Previous Page) ding that he did not know of anv b, ones in trouble.

lmost all developers, however, activities to David Thomson of the Oxford Development Co. whin is based in Toronto and had bees one of the major Canadian commiss in the redevelopment of North America over the last decade pust now align themselves with snificant long-term money. "It's aevolution," he recently re-marked "that may lead to a blanderandscape."

To surive, many of the traditional, errepreneurial and specu-lative declopers have become "merchal builders," creating. managing ud leasing a product for fees with like equity and reduced exposure toisk.

Generallythe real estate industry has becole much more sophis-ticated and pofessional in recent years, with more concerns becoming national offiliated with larger organization and more substan-

tial investors. Miss Lachmp noted that the percentage of cumercial projects handled by natihal developers as opposed to local evelopers 'is definitely on the increase and will continue to grow," alrough it has remained fairly stealy in housing at about 16 natures. The project will advance the street's claim to being the most impressive high-rise boulevard in the nation. The New York architec-

tural firm of Kohn Pedersen Fox is involved in this and the Lincoln about 16 percent. Jerry I. Speyer of Ishman Speyer Properties, a leating developer based in New York hat has aligned

itself with the Equitale Life Insurance Co. in several rajor projects, said his concern would "pull in its horns a little bit this par." Virtually all markes favor the

tenant with significan lease concessions in the form obsubstantial free rent, tenant instalation and liberal escalation clauss. Asking prices for rents in most reas have fallen a little or remaind flat for the last few years, before taking inflation into account. Insome depressed markets such as Houston. rents are 50 percent of what they were just a few years ago.

The Northeast continues to reas-sert itself. Philadelphia, for example, is one of the most active new development markets with several significant downtown projects.

And Washington is witnessing a phenomenal redevelopment that stretches from the waterfront in Georgetown to the West End, where three new luxury hotels, the Grand, the Westin and the Park Hyatt, have established a major new center, and to Franklin Square, where Trammell Crow, Gerald D. Hines and the Cadillac Fairview Corp. have feelined on the

# New Housing Starts Heading for Decade Record

Nettleton Company, a mortgage banking concern based in Dallas.

The market, however, collapsed in the South and the mountain regions. The national statistics fell 23 percent in 1985 from a record 303,000 units in 1984. Over the last two years, the study said, more condominiums in the South reverted to rental than were completed.

It reported that about 80 percent . stacked units, built like garden or midrise apartments. This type of condominium has the softest mayket and the poorest resale acceptance everywhere. It is also the most vulnerable to rental competition. In the Northeast, however, more than half the condominiums are townhouses, the best accepted

"Where Sunbelt rents are depressed by the most overbuilt market in 20 years," it said, "the Northeast rental market is the tightest in 20 years; the Northeast vacancy rate is a third that of the Sunbeit."

# Investors Are Urged to Fish Expected For Oil-Service Stocks

By VARTANIG G. VARTAN

EW YORK — "Bottom fishing," or angling for stocks that show prolonged price declines, is a popular sport on Wall Street. It also can be hazardous to the pocketbooks of investors whose timing is off. Despite this inherent danger, two analysts at Shearson Lehman Brothers suggest that hardy investors might begin fishing for selected oil-service stocks. They describe this as a "contrarian approach" to a

"Several companies will continue to generate sufficient cash flow to meet minimum capital-expenditure requirements and maintain dividend payments," according to a report by Kenneth S. Miller and Russell J. Hoff-

Many professionals

say it's too early

to buy oil-related

shares.

man. Their choices, in order of preference, are NL Industries Inc., Dresser Industries Inc., Schlumberger Ltd., Hallibur-ton Co. and Baker International Corp.

There is no ironclad guarantee that these companies will maintain their current

dividend payouts.
While the Shearson analysts regard Schlumberger's dividend as apparently "very secure" — the stock yields about 4 percent — they also stress that dividend payments for both Halliburton and Baker "are likely to be well in excess of earnings over the next

T PRESENT market prices, Halliburton yields about 8 percent and Baker yields about 6.5 percent. NL Industries, which slashed its dividend several years ago, yields about 1.5 percent. In mid-April, NL announced a restructuring program involving the buyback of up to 32 percent of its stock and the relief percent of its above of the prices. the sale of part of its chemical business

Prices of most oil-service stocks topped out in late 1980. Since then the companies have suffered from plummeting prices for crude oil and natural gas. This, in turn, has caused energy producers to slash their exploration budgets. As measured by the rig count, drilling activity in the United States has been cut almost in half since late December.

In the first quarter; stock prices of companies providing oilwell equipment and services fell 13.1 percent, according to the Standard & Poor's Corp. Among 82 industry groups, the only other one to show a bigger decline was offshore drilling — down 39.2 percent. In the same period, the S&P 500-stock index rose

How receptive have institutional investors been to the suggestion of bottom fishing in oil-service stocks? "Money managers in the oil patch are more willing to listen than those in other parts of

the country," Mr. Hoffman said. But many professionals do not seem to be listening. David Dreman, managing director of Dreman & Embry Inc., an investment counseling concern in New York, is a self-styled contrarian who likes to buy stocks with low price-earnings ratios and reasonably high yields. "We once owned Schlumberger and Halliburton but sold these stocks a couple years ago," he said. To drill for oil at a time like this involves a risk on the time horizon. Therefore, I think it's much too early to buy stocks in the oil-services industry. Instead, we own some producing companies, such as Amoco, Texaco and the Standard Oil Co.

James D. Crandell, who follows both oil-service and drilling companies for Salomon Brothers, anticipates "a severe shakeout" for the industry this year and in 1987. "I think many companies will take asset write-offs," he said. "You will see additional

# New Offer For Bates

### Interpublic Said To Make Bid

By Bob Hagerty memational Herald Tribu

LONDON — Interpublic Group of Cos. apparently is seeking to buy Ted Bates Worldwide Inc. in a move that would thwart Saatchi & Saatchi Co.'s effort to acquire Bates, industry sources said

Privately owned Bates is the third-largest advertising company in the United States.

Both London-based Saatchi and New York-based Interpublic, which owns McCann-Erickson and several smaller ad agencies, are among the biggest ad companies in

Saatchi has made clear that it aims to be the largest, an ambition that probably would be fulfilled by an acquisition of Bates.

Saatchi confirmed earlier this week that it was holding talks aimed at acquiring Bates. A source close to Saatchi said Wednesday that the negotiations were "clearly at an advanced stage" and that Saatchi was likely to decide soon whether to proceed.

The source said the acquisition would cost around \$500 million. He questioned whether Interpublic could afford such a large purchase and suggested that the company might be seeking only to thwart Saatchi's offer or to make it more

An Interpublic spokesman re-

For 1985, Interpublic reported net income of \$36.6 million and revenue of \$691.5 million. Saatchi has forecast that its pretax profit will total at least £67.9 million (\$105 million) in the year ending

Sept. 30. Bates has been trying to find a buyer for itself for at least a year. The chairman, Robert Jacoby, owns a large share of the company and has been reported to be eager to sell his stake before retiring. Previous talks between Saatchi

and Bates over the past year have failed to produce an agreement.
Aside from advertising, Saatchi is expanding its business in man-

lations and other service areas.

# Peugeot SA Returned to Profit in '85

PARIS - Pengeot SA, the PARIS — Pengeot SA, the French private automaker, said Wednesday that the parent company made a net profit of 165 million francs (\$23.3 million) last year after a 1984 loss of 204 million francs.

A spokesman said the return to profit was mainly the result of improved productivity and good vehi-cle sales for its Citroen division.

It said it expects the Peugeot group, which includes Automobiles Peugeot and Automobiles Citroen, to show a return to profit for 1985 after several years of large losses.

Consolidated group results for 1985 will be published around the end of May, it said, and should confirm forecasts already made about the group's return to a mod-

ment to the government's econom-

## Spain Strengthens Its Auto Industry Sale of SEAT Helps Prepare Sector for EC Competition

By Steven J. Dryden
International Herold Tribune MADRID - Juan José Diaz Ruiz, the director of export sales for the Spanish automaker SEAT. recalls that when Ford Motor Co. began manufacturing in his country, people said of Spanish workers,

"Sure, these guys can light bulls, but can they make cars?" That was a decade ago, and since then the record of Spain's car in-dustry has dispelled any doubts about its potential. Along with Ford and General Motors Corp., all of the top European volume car makers are now manufacturing in Spain. Spanish auto exports last year totaled 787,000, the third highest level in Europe.

Spain is the best place in Europe to make cars if you organize production properly," said John Lawson, a car industry analyst for DRI Europe Ltd. "The wage costs are favorable and the work force has shown itself to be a little easier to manage than in some of the more developed countries."

Spain Goes European' A Laggard Economy Learns to Compete

Spain will undergo wrenching changes as a new member of the European Community. including an end to tariff barriers and a paternalistic labor series of occasional articles examining that adjustment.

pean Community is changing some of the conditions that give car makers there an advantage.

Spain reserved its highest tariff protection — 36 percent — for the auto sector, while EC countries apply tariffs close to 4 percent. As able again. these high tariffs come down under the terms of Spain's EC accession treaty, imports from other EC countries are expected to rise.

There may also be challenges

tion — Sweden, Norway, Finland, Iceland, Switzerland and Austria. In the past, Spain has virtually banned Japanese direct imports, a barrier that may not be permitted by the EC. EFTA cars can be sold tariff-free in EC nations if their content is 60 percent from EFTA

To meet this new competition, the Spanish government has already taken steps to strengthen the car industry. In the past six the drop in first-quarter group sales months, a financial aid package was negotiated with several French car makers to modernize their Spanish operations and trim work forces. The government also sold SEAT, which has been consistently posting losses recently, to Volks-

The problems created by increased imports could be compounded by the sluggish domestic market. Industry analysts believe cent of the world's compact discs, that the market has a potential for See SPAIN, Page 15 But Spain's entry into the Euro- from Japan and the six members of

# **Philips Reports** 45% Fall in Net In First Quarter

AMSTERDAM — Philips NV, earner, but Mr. Spinosa Capella thrope's biggest electronics consumer-elec-Europe's biggest electronics concern, said Wednesday that net tronics sector should achieve a posprofit fell 45 percent to 144 million guilders (\$57.6 million) in the first quarter of 1986 from the year-earli-

The Dutch-based company said sales fell 8 percent to 13.06 billion tor remained flat after operating profit dropped to 44 million guil ders last year from 1.21 billion in guilders in the latest quarter. On a per-share basis, first-quar-ter net totaled 0.63 guilders, com-pared with 1.22 guilders a year earthe anticipated recovery in the U.S.

In the first quarter of 1985, net totaled 260 million guilders and sales amounted to 14.24 billion

Philips said it got off to a slug-gish start this year because of the weakness of the dollar and a slow-down in the recovery of the U.S.

Bob Spinosa Capella, a member of the Philips board, said at a news conference that profits should still

improve this year. We are not surprised first-quarter profits were down, but it is a bit worse than we'd expected," he said. Philips said the combined effect of changes in exchange rates and prices accounted for 13 percent of

in guilder terms. In volume terms however, volume grew by 5 percent, largely because of improvements in const er electronics, Mr. Spinosa Capella

Voicker, the charman or the Federal Reserve, urged Congress on Wednesday to pass emergency legislation that would give federal banking regulators more powers to deal with failing U.S. farm and energy holes Mr. Voicker told the House subcommittee on financial institutions supervision that the

legislation was needed because of pressures on banks in parts of the country that "face unusu want fewer restrictions on their tex- ating ploy, and expect many coun- comes at a critical time for the ally severe economic conditions" because of turmoil in energy and agricultural markets. The Fed chief said legislation

proposed by the three banking regulatory agencies — the Fed, the Federal Deposit Insurance Corp. and the Comptroller of the Currency - would provide further assurance that actual and potential problems were

dealt with expeditiously. He added that it was hoped that the measures would prevent "a potentially contagious and debilitating loss of confi-

dence within a state." The proposed legislation

would expand emergency acquisition powers to permit pur-chases of failing and failed banks with assets of \$250 mil-

It would also allow interstate acquisition of troubled multi-bank holding companies, or some or all of the banks within such holding companies, Mr. Volcker said. But be added that he hoped the legislation would never have to be used.

# Majority in Congress Warn Reagan on Textiles

ride his veto iast year of legislation to curb textile and apparel imports, and urged him to help the importsearch, sales promotion, public re-

hattered textile industry. In a letter on Tuesday, 302 representatives and 70 senators urged the president to implement existing textile trade agreements aggressively while his trade negotiators seek a stronger pact to curb the surge in

imports.
The legislators said Mr. Reagan's actions on imports will pro-vide "the context" within which Congress will consider on Aug. 6 whether to override the veto of the legislation. The legislation was sponsored by Representative Edgar L. Jenkins, a Democrat of Georgia, and Senator Strom Thurmond, a Republican of South Car-

Negotiations on a new Multi-Fiber Arrangement, the interna-tional agreement that covers textile and apparel trade, are scheduled to

Mr. Reagan promised in his veto message that he would aggressively renegotiate the arrangement to help the textile industry.

## Important news for international marketers. The new Frequent Business Traveler Study is available free from the International Herald Tribune.

The frequent business traveler represents an extremely important market, not only for marketers of travel-related products and services, but for any advertiser wanting to reach the truly senior international executive.

Recognizing the need for reliable data about this elite management group, the International Herald Tribune commissioned Research Services Ltd., London, to undertake Research Services Ltd., London, to undertake the Frequent Business Traveler Study. This research, carried out in late 1985, uses a sample frame taken from the guest lists of Hilton International, Inter-Continental, Marriott and Sheraton hotels located in London, Paris, Frankfurt, Geneva, Brussels, Abu Dhabi, Dubai, Jeddah, Hong Kong, Singapore and Jakarta. The survey attracted a total of 2,531 respondents, of whom an overwhelming majority—2,368—claimed to have traveled abroad on business during the past twelve months.

Topics covered by the research include Topics covered by the research include readership habits; frequency and purpose of air travel; destinations visited; hotel usership; duty-free purchasing; car rental frequency; credit card usership; job status; company purchasing responsibilities; income levels.

Copies of the research report are available at no charge from the Marketing Department of the International Herald Tribune at any of our main offices listed below.

# Trafalgar House Agrees Busch May Buy Hong Kong Unit To Takeover of Brown To Takeover of Brown To Increase Conrail Bid Norfolk Southern Asked BMW Names 2 to Managing Board Compiled by Our Staff From Dispatcher MUNICH — Bayerische Moloven Werke AG said it made 1880 United Artiste Composed it da Power Financial's pagent To Increase Conrail Bid

WASHINGTON - U.S. Transportation Secretary Elizabeth Dolc, facing a dead end for her Conrail sale proposal in Congress, has asked Norfolk Southern Corp. to increase its bid for the government-owned rail carrier to \$1.9 bil-

Mrs. Dole said Tuesday that she would urge Norfolk Southern to raise its current \$1.2-billion offer after Representative John Dingell, a Michigan Democrat who is chairman of the House committee over-Southern merger.

Mr. Dingel's opposition appears to doom the administration proposal because, as chairman of the Dole. House Energy and Commerce Committee, he can block consider-ation of any Conrail sale proposal in the Democrat-controlled House.

Mrs. Dole indicated that the higher price for Conrail could be partly financed out of the \$360 million in excess money now in the tional airline, said its net profit more than doubled in 1985 to 48

any anti-competitive concerns billion in 1984. raised by the sale to Norfolk Southern, a major eastern railroad and were the best since the airline was

to the Interstate Commerce Com-

She suggested congressional approval of the merger be contingent on an ICC finding that the anticompetitive concerns could be remedied by divestiture of track to rival railroads that could provide continued competition in the Northeast and MidwesL

Mrs. Dole's latest proposals followed a blunt letter from Mr. Dingell saying that he had made up his mind to oppose the merger.

"There is no justification for the seeing Conrail, announced his op- government to undertake the largposition to a Conrail-Norfolk est parallel railroad merger in the history of the United States and create the massive anti-competitive impacts and employment losses that would ensue," he told Mrs.

### INTERNATIONAL POSITIONS

International Livestock Centre for Africa

### FINANCE OFFICER

Vacancy INT/005/86

The International Livestock Centre for Africa (ILCA) with headquarters at Addis Ababa, Ethiopia, is one of 13 international agricultural research organisations which are supported by the Consultative Group on International Agricultural Research (CGIAR), an association of governments and donor agencies, cosponsored by the World Bank, FAO, and UNDP.

ILCA is offering a challenging opportunity to a Finance Officer with a proven record and experience of international or multi-national operations, including responsibility for budget planning, control, cash-flow management, consolidation and reporting procedure. Experience in EDP will be an advantage.

The position is based at the Centre's headquarters; travel to supervise the Centre's programmes in other parts of Africa will be required. The position will be particularly attractive to candidates showing initiative, leadership and a strong team spirit.

Recognized accounting qualifications, with experience in computerized accounting, are an essential prerequisite and an MBA or other post graduate degree would be advantageous. A good knowledge of English is mandatory and a knowledge of French advanta-

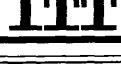

The appointment will be on an initial two year contract, annually renessable thereafter. The salary (in US dollars) is at international rates, tax free, together with fringe benefits.

Applications, which will be treated with absolute confidence, should be sent to the

Personnel Officer,

ILCA

P.O. Box 5689, Addis Ababa, Ethiopia, not later than May 31, 1986.

**INFORMATION SERVICES OPERATION MANAGER** A SENIOR ROLE WITH THE WORLD'S SECOND-LARGEST COMPUTER COMPANY

Digital Equipment is the world's second-largest computer company. Our European Headquarters in Geneva provide managerial, administrative and technical support to 18 European subsidiaries.

We are looking for a highly experienced Operation Manager to take responsibility for defining and driving the programmes needed to increase the delivery of efficient and effective computer and network operations to all our offices across Europe for our employees. Your duties will not only include providing

leadership and direction to a group of subsidiary Information Services Managers and to the Headquarter operations, but also to contribute to the development and implementation of Information Services strategies.

Success factors in this position will be not only the technical qualities, but also having the personality to forge a strong, effective working relationship with the subsidiaries and within the Headquarter operations.

You will have, at least, 10 to 15 years of experience in Information Services Management within a leading technology company (or alternatively 5 to 10 years of experience within a computer vendor or software engineering firm). You will also have proven people management skills as well as negotiating skills, be fluent in English (French and/or German would be an asset). You should also be self-motivated, assertive, stress-resistant, and free to travel.

This job offers a tremendous challenge and is accompanied by an excellent salary together with the fringe benefits expected from a major international organization, including relocation assistance where appropriate.

Please send your resumé, in English, to Mrs Hennie Pols.

### Belgium Is to Reduce Key Interest Rates Again After EMS Realignment

BRUSSELS — The Belgian National Bank cut on Wednesday its official interest rates, reducing the key bank rate, or discount rate, for the third time since last month's realignment of

The quarter-point reduction in the bank rate to 8.5 percent, effective next Monday, takes the rate 1.25 percentage points below its level when the EMS realignment was approved on April 6.

Bankers said the cuts reflected confidence in the stability of the Belgian franc following its upward revaluation within the system.

They added that the lower interest rates also demonstrated the desire of the Belgian authorities to cut rates as much as possible, both to stimulate the economy and to curb the government's budget deficit, which is due largely to

ment's budget deficit, which is due largely debt-servicing costs.

MILAN — The Italian state-owned car maker, Alfa Romeo SpA, said Wednesday that it is oil-services companies to show losses in the next three quarters. As for Schlumberger, they said that most of its earnings will come from interest income on \$4.6 billion in cash."

Smith Barney, Harris Upham & Co., citing "contraction in industry activity," recently lowered its projection for the company's earnings this year to \$1.25 a share from \$1.50. And at Paine Webber Inc. James L. Carroll has downgraded Schlumberger's rating to "unat-tractive." He also reduced the 1986 earnings estimate to \$1.40 a share

In the early 1970s Schlumberger was one of the investment community's "Nifty Fifty" favorites. By 1980 its price reached a high of 87%. In March the stock traded at \$29, its lowest level in seven years. The shares ended Tuesday off 12½ cents, at \$30.25.

Mr. Carroll also recently downgraded his rating on Hughes Tool from "neutral" to "unattractive." He added, "Although we view Hughes Tool as a survivor in the current oilfield depression, the sharp drop in cash flow during the next two years will place its divi-

dend in jeopardy."

Most analysis expect Hughes
Tool Co., with an annual dividend rate of 48 cents a share, to show a loss for this year. The stock finished Tuesday down 25 cents, at pays no coupon for the first two Toyobo Co. that pays 8 percent stretching to over a point at the \$9.50. Its high in 1980 was \$48.65½, years of its five-year life. However, over seven years.

THERE seems something a little unwieldy A about the narrative technique used by Craig Nova in his powerful new novel, "The Congressman's Daughter." Not that it's a seri-ous distraction, for it's impossible to resist the here of Nova's story about a contention that develops between Harlow Pearson, a congressman from a rural New England town, and his beautiful, strong-willed daughter, Alexandra, and the complex and tragic aftermath of their strife.

It all begins simply, with Pearson teaching his child how to fly-cast for trout by taking her up on her bets that she can wade a little deeper or cast a little farther in the river that flows by their property. Then, after Alexandra has gone to college, Pearson carelessly breaks a fishing date with her at a time when she needs him. She runs off to California and comes back preg-nant. At furious loggerheads over whether to keep or abort the child, father and daughter engage in a more serious angling competition. Before it can be resolved, events are set in motion that will all but ruin Alexandra's life.

Still, for all the force of this unlikely yet strangely plausible tale, a reader finds himself wondering every so often why Nova, whose previous novels include "The Geek" and "The Good Son," has chosen to cast as his narrator Pearson's nameless next-door neighbor - a man with a shadowy family that never appears onstage, and the curious profession of repair-ing trout habitats. After all, this neighbor never tries to influence events, no matter how outrageously immoral, and even criminal, the behav-ior of the actors in the story. And it requires

Solution to Previous Puzzle BASSE UCLANICKELODEON LIV such contrivance to maneuver them into he home to recount their various versions of what

is going on that we are occasionally distinct a Yet eventually it becomes clear what Newstrying to accomplish with this charge and the second The neighbor in question is really more than the narrator of immediate events; he is chorus who describes the reaction of the local townspeople to what is going on. His tole a interlocutor is important because what resis engages us in this story is not so much the melodrama in the foreground as the moral drama that frames the action.

Will the caste-ridden townspeople allow the interlopers among them to get away with mander? Ultimately, the force that matters most in "The Congressman's Daughter" is the questro of propriety. Propriety is both the villain and the hero of Nova's tale. The way it contends: with itself and resolves its own conflict makes for a penetrating comment on U.S. life-inthat lends substance and humor to a work for for a while seems to risk deterioration into pastoral potboiler.

Martin Cruz Smith's previous novel fourth, was a tour de force of an international thriller, "Gorky Park," in which the author managed to evoke, at least for an audience unfamiliar with the real thing, the timbre and tone of a criminal investigation set in the Soviet Union. In his new novel, "Stalling Gate," he attempts something almost as daring
— a complex drama involving the little society that was created in 1943 to explode the first atomic bomb at the site of Stallion Gate in the desert of New Mexico.

The book gets off to a bold beginning the Pena, a Pueblo Indian imprisoned at Leaven worth for insubordination (he slept with an officer's wife), is recruited by the chief of security at Los Alamos to guard and spy on the physicist J. Robert Oppenheimer (or Oppy, as the narrative insists on calling him), whom the security chief suspects of communist sympathies. Hardly has Joe gone to work when he finds himself in bed with the security chief's wife, then off on a murderous deer bunt with his aggrieved superior, who is a vicious racing There is high drama as Joe's boss tries to gue

But from this point on, the drama dissipates. Joe Pena, irresistible lover, skilled jazz pianis, outstanding heavyweight boxer and sniffer-out of communist spies such as Klaus Fuchs as Harry Gold, is just a little too good to be true. The plot, which divides and subdivides the point where it equates the question of Pena's postwar happiness with the ethics. incinerating whole Japanese cities, is much the complicated to be interesting. Somewhere the debris, one senses the impending men that genocide begins at home — that below shima there came the Navajo h grounds. Perhaps there are subtleties nestling a

Cruz's welter of melodrama. I may be mistaken in my impression that the good guys are all Indians, females, blacks and Jews, while the bad guys are Texans and the Axis militarists of World War II. The problem is, one never seinterested enough in the story of "Stalling Gate" to give serious consideration to such important issues.

# Haas Wins 6th as A's Bury Blue Jays, 17-3

TORONTO - Dave Kingman, who has been helping Oakland win games for the last two seasons, and Moose Haas, who's only been with the team about a month, combined their talents Tuesday against the Toronto Blue Jays. The result was devastating.

Last year, Key compiled a 14-6 record and 3.00 ERA. Williams said he now might start result was devastating.

Kingman hit two home runs and drove in five runs, while Haas pitched a three-hitter over seven innings as the A's shellacked the Blue

Oakland's 17 runs and 17 hits are highs for the American League this year.

son (he has yet to lose). Toronto hasn't beaten Haas since Sept. 22, 1984 when he was with Milwankee.

Oakland's offense seems especially potent when Haas pitches: The A's have scored 55 runs in the six games he's started. "When the team jumps out in front, it makes my job a little easier," he said. "Everything's working for me."

Haas struck out five and walked one. His unbeaten start is the best for an Oakland hurler since Matt Keough and Mike Norris both got off to 6-0 starts in 1981. He gave up a basesempty bomer to Jesse Barfield in the fifth; it was
Winfield drove in the tie-breaking run with an Barfield's 93d as a Blue Jay, breaking John Mayberry's club record.

his first of the year to trigger a five-run third. bases to increase his league lead to 22; he has stolen 18 bases in his last 17 games.

Tony Phillips and José Canseco followed with stolen 18 bases in his last 17 games.

Kingman hit his first home run of the game
carry New York past the White Sox, who have ding off the second and Mickey Tettleton hit lost seven of eight. Henderson also stole three

left-field bleachers, chasing Jimmy Key. The pitching hand during spring training, gave up

61/3 innings to lead Texas past Detroit.

Orioles 5, Twins 3: In Minneapolis, Juan Bonilla, Eddie Murray and Lee Lacy homered, and Storm Davis scattered seven hits through 74 innings to lift Baltimore. Entering the game, the Orioles had hit only 15 home runs all year.

Reds 2, Braves 0: In the National League, in Cincinnati, a homer by Dave Parker and the combined six-hit pitching of Bill Gullickson and John Franco helped the Reds end a nine-game losing streak and a skein of 11 straight defeats at Riverfront Stadium.

Mets 4, Astros 9: In New York, Dwight Gooden pitched a two-hitter and George Foster hit his first home run of the season as the Mets won for the 15th time in their last 16 games.

Giants 7, Pirates 2: In Pittsburgh, Candy Maldonado and Chris Brown hit two-run homers to back the seven-hit pitching of Mike Krukow as San Francisco won its third straight and ended a Pirate winning streak at four.

Padres 3, Cardinals 2: In St. Louis, pinch hitter Jerry Royster doubled in Leon Roberts from first base with two out in the ninth as the Padres handed St. Louis its 13th loss in 15 games. Jack Clark's home run was was the first by a Cardinal in eight games.

Expos 8. Phillies 0: In Philadelphia, Andy McGaffigan posted the first shutout of his major-league career and Vance Law and Andre Dawson hit two-run homers as Montreal coasted to its fourth straight triumph. Loser Steve Carlton (1-5) gave up six runs in five innings.

Cubs 7, Dodgers 6: In Chicago, Leon Durham led off the minth by homering on reliever Tom Niedenfuer's 0-2 pitch, edging Los Angeles for the Cubs. Dodger starting pitchers are 13-7 this season; the bullpen is 0-8. (UPI, AP)

units were extremely successful. The Flames scored two powerplay goals and added a short-handed goal to thwart the Blues, 5-3, and take a 2-1 edge in the Campbell seconds into Game 3 - on a power

play. "They took a penalty right away and we capitalized." said Cal-

gary Coach Bob Johnson. "It was a big goal."

Compiled by Our Staff From Dispatch **BOSTON** — The Boston Celtics gave the Atlanta Hawks no quarter in the third quarter.

Kevin McHale scored 16 points 36-6, in Tuesday night's third period en route to a 132-99 victory that knocked Atlanta out of the Nation-knocked Atlanta out of the Nation-knocked Atlanta out of the Nation-knocked Denver 40-20 for a 72-46. ai Basketball Association playoffs. The Hawks' six points was the lowest single-period total in playoff history (the previous low was eight, by the Los Angeles Lakers against Milwaukee in 1972). While Boston closed out its East-

ern Conference semifinal, 4-1, the Lakers and Houston took 3-2 leads and 17. in the Western Conference semifinals. The Celtics now await the winner of the Philadelphia-Milwankee series, which is tied 2-2 going into Wednesday night's game at Milwaukee.

"We were running and they were all confused," said McHale, who finished with 25 points. "They just looked like punch-drunk sailors."

It was 66-55 at halftime, with Larry Bird having scored 24 of his comfortable 78-61 advantage with 5% minutes left in the third quarter.

Then came a 24-0 streak that made it 102-61 at the end of the period. The Celtics were 13-for-21 from the field in the quarter and the Hawks 2-for-19.

Said Atlanta Coach Mike Fratello: "We just lost our concentration. There's nothing you can do. You try to substitute, you call time-

ENCORE — In a game Saturday, California outfielders Gary Pettis (right, both photos) and Brian Downing collided, leaving both momentarily stunned; they did it again Tuesday in Boston, chasing Rich Gedman's fly ball. This time Pettis, who earlier had hit his first home run in 115 games, suffered severe contusions above the left knee. "I'm getting a little tired of it," said Gene Mauch, their manager, "When you run into Brian Downing, you're not hitting a load of pumpkins."

### \$2-Million Getty Gift For Books Lost in Fire

to think I'm really a nice guy."

United Press International LOS ANGELES - The J. Paul Getty Trust has given the city of Los Angeles \$2 million to help replace the thousands of books lost in an arson fire at the 60-year-old

Central Library. The president of the trust, Hared to about 10 percent of the monev needed to replace the books destroyed in the April 29 fire. The city has received \$12,000 in other donations for the library, mostly in amounts ranging from \$1 to \$100, Mayor Tom Bradley said.

ncluding South Korea." "Why South Korea?"

"They don't like you there, David. You wrote a 'kiss-and-tell' economics book, and that's the worst kind. I didn't appreciate the way

came out in the book, either." "Aw, come on, Mike. It was all in fun. I made you out to be a glorified press agent for the president. In this country that's someone to

"David, I have several reasons for not taking you. The most important one is that if you become my client I'll lose my White House pass. Then in order to get in and see the president I'll have to stand in line with all the tourists. That nass means more to me than 10 new clients. You should have realized you'd create an image problem when you wrote the book."

"It's not my fault that Reagan's politics triumphed over fiscal com-mon sense. All I tried to do was show how wrong we all were. I took as much blame as I laid on the White House staff. Mike, you're the only one who can help me." "What can I do?"

"See if you can get the president to give me a blurb for my book. If he does, Don Regan and Caspar Weinberger will have to follow

"Why should the president endorse your book?" That's what I'm hiring you for

- to figure it out." "Thank you, but no thank you."

"Mike, I've never asked you for anything in my life. One photo of Nancy reading The Triumph of Politics' to the president is all I'm asking for."

"It can't be done." "Why not?"

"The president doesn't like books about deficits and tax bikes.

They bore him."
"I didn't say it would be easy,
Mike. If it were easy I wouldn't be old M. Williams, announcing the hiring you. But just think what a gift Tuesday, said the gift amountme look good with this administra-

"Even I couldn't pull that one off, David. I was in the White House mess yesterday, and do you know how they refer to you there?

Born the son of an army officer

British classes through history.

By Kathy Stephen FROME, England — A curved driveway leads past a lawn scattered with antique busts to The Chantry, the austere gray stone house where Anthony Powell, high priest of the postwar British novel, has lived, written and held court for decades.

On the sort of spring day when sun and showers fight for dominance over Somerset in western England, Powell - whose 12-volume cycle of comic novels, "A Dance to the Music of Time," is regarded as a modern classic answered the door himself and showed the way into a sitting room where a fire is lit and an air of bookish calm seems to have existed for several eternities. Perched on a red settee, he mused on his life as a writer and on his long-awaited new novel, "The Fisher King."

At 80, Powell (the O is long) is still a handsome, robust man. Speaking with the accent that Eton and Oxford produce, he deflected some questions, dismissed others and indicated in general that, though he might have published close to two million words in more than 50 years of writing, he was not going to give anything

To Powell fans — and he sells more books in the United States than in Britain — this should come as no surprise. Here is a writer who published four vol-umes of autobiography ("To Keep the Ball Rolling") but man-aged to devote the vast bulk of it not to revelations about himself but to descriptions of his illustri-ous friends. For this he offers a compact, very British explana-tion: "It is better to keep one's deepest thoughts about oneself to

marriage that produced two sons, "I'm much more interested in and consistent success as a novelother people than I am in myself as a study," he said. "I'm interestthat very rare thing, a happy arted in myself in normal, selfish ways, but I don't find myself a very interesting figure, in terms of examining myself." my life as much as anybody can enjoy life at all," he said, "that is,

In "A Dance to the Music of Time," he proved himself a mas-Time," he proved himself a master of characterization, creating a galaxy of 400-odd characters in difficult: For some people their

the upper and middle echelons of British society from the 1920s to what it's been. I never see my life what it's been. I never see my life the 1970s. Those who enter Powvery dearly. ell's world through "Dance" are "I'm not at all jolly - couldn't borne along on a smooth sea of

be less. All roughly what are called comic English writers, delt, witty prose, only to be jos-tled occasionally by swift, dark they're all tremendously melanmelancholic currents underneath. choly. One of the things about the Powell is perhaps the last of a English is that I think they always generation of gentleman English find that they can never really believe in life at all -it all seems writers who have not only described but played a part in a world of debutante dances, bytotally strange to them."

Powell's pet cat. Trelawney, a prehistoric-looking creature of the breed called Cornish Rex. prowled around the sitting room restlessly. "The slightest noise al-ways puts him off," Powell said, "but the thing he really dislikes is camera crews." Powell and Trelawney had to cope with a number of those in conjunction with the writer's 80th birthday in December and, more recently, the attention in connection with "The Fisher King" (Heinemann), which came out in Britain this spring and is scheduled to be published in the United States this

The setting of Powell's first full-length novel since the last volume of "Dance" came out in 1975 is a cruise around Britain, circa 1980. Saul Henchman, a celebrity photographer who was crippled in World War II and is presumed to be the Fisher King of the title, is accompanied by the beautiful, enigmatic Barberina Rookwood, who has sacrificed a brilliant career as a ballerina out of love for and devotion to the impotent Henchman.

The story focuses on both characters' struggle toward freedom, with the plot kinging on what happens to their relationship. Also brilliantly drawn are the mi nor characters on the cruise ship, with such Powellesque names as Valentine Beals and Lorna Tip-

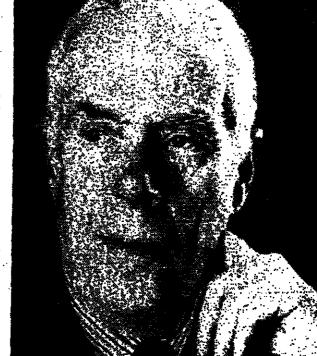

Like T. S. Eliot in "The Waste Land" and Wagner in "Parsifal," Powell wanted to explore the Arthurian myth of the king who is wounded and his lands made barren until regeneration arrives through the deeds of the young knight Perceval. He takes his cruise to the Orkney Islands, al-

I'm afraid. I'd very much like to, but for the moment I don't think I'll have any ideas. So that's where I'm left at the moment, just hovering on the edge." After a lifetime of interviews,

he dislikes describing what he views as the tedious details of his method of working. Writing is al-ways difficult for him, he said, though he has managed to pro-duce so much. "Yes, I seem to have done, when I look at the list. I can't quite think how. I always think I'll never be able to write another line when I get up from my typewriter. I must say, I feel completely cooked, as a rule."

Though few critics wonder if Powell's works will survive the test of time, he is not complacent about his reputation: "When you think of the people who you thought when you were young were totally sale, and now are forgotten, it's nice to feel one might be remembered. I don't set up to be at all indifferent to

Smith Sculpture Bought For Record \$1.3 Million

A welded steel work by Davis Smith has set a record for a contemporary sculpture, selling to \$1.32 million (including premum at Christie's in New York, but: Jasper Johns painting that was ex pected to set a record went unsold Smith's 1963 work, titled "V.B. XXIII," was bought by an anony mous collector, said a Christic spokeswoman, Lili Friend, Johns. Target," a series of blue and ver low concentric circles on a ne background, painted in 1961, fallerto reach its reserve price, despite bid of \$2 million.

Martina Nevratilova was finer

\$1,000 by the U.S. Federal Avia-tion Administration for carrying; concealed gun and ammunitor aboard an airplane in March, at FAA spokesman has confirmed Russell Park of the agency's Los Angeles office said the tennis star told authorities March 2 in San Francisco that a .38-caliber Smith & Wesson and 10 rounds of amounition were packed in a carry-on case by mistake.

Will Steger, fresh from a history dog-sled trip to the North Main now intends to try one to the South Pole. "It's a way of life," said Steger, 41, of Ely, Minnesota "I was born with the spirit of the North." Last week Steger and five comrades, showing signs of frost-bite and fatigue, completed the first confirmed trip to the North Pole by dog sled without resupply since Admiral Robert E. Peary located the pole in 1909.

Prince Charles made light of a fainting spell suffered by his wife, Diana, and joked about the permnial rumors that she was pregnant. At a dinner Tuesday night, on the couple's last full day in Vancouver before leaving for Japan, the prince said: "It is really entirely due to the extremely advantageous conditions that pertain in British Columbia the weather and the general fertile conditions, which have ensured that she's about to have sextuplets, which is really why she fainted" in the California pavilion at the end of a five-pavilion tour of the Expo '86 world's fair. The audience seemed stunned, so the prince quickly added: "It's not actually
